Structural Intern

Do you want to work for a firm that offers exciting projects, career development opportunities, flexible schedules, and a friendly work environment...then come join our team!

Flad & Associates is a national Architectural/Engineering firm, specializing in the design of technology-driven facilities. We have enjoyed success through diversity and specialization in several key markets including: Academic, Federal, Health Science, Office/Workplace, Science & Technology, and Strategic Facility Planning. Flad has over 285 employees nationwide working in the following disciplines: Architecture, Structural Engineering, Construction Administration, Interior Design, Landscape Architecture and Specifications.

We have an excellent opportunity for a structural intern in our Raleigh, NC office. Full-time (40 hours) during the summer, potential for part-time (10-15 hours per week) during the academic year. Qualified applicants must be pursuing structural/civil engineering or equivalent degree and be in their fourth year of the undergraduate engineering program or working on a masters degree. Proven communication skills and strong customer service attitude that compliment strong conceptual and analytical skills essential. Individuals must be self-starters capable of delivering in a collaborative team based setting and have an interest in gaining experience in a variety of complex building types. Familiarity with engineering design software, spreadsheets, and AutoCAD is a plus.

Qualified candidates can submit their resume via our website by Friday, March 26 at www.flad.com, e-mail: humanresources@flad.com or mail to: Flad & Associates, Attn: JH; 434 Fayetteville Street Mall; Raleigh, NC 27601. AA/EOE.
