Starting from November 2008, under the rise on a yearly basis without any interval up to the 1921 level peaked in September 2011. This rise has been written several times about the reasons. In October 2012, after the 1800 attacks to the level that is right under the period of the rise and fall of the wounded that we watched the start of the period.

Nowadays we come to the end of 2013 **gold** has declined to the level of 1200. Especially since May, started to talk abatement bonds the Fed finally took a step in the program of 10 billion dollars abatement began. In these circumstances, who will be deprived of cheap and plentiful liquidity **of gold** has suffered from this condition can say. Terms of inflationary pressures as well as the lack of data on the U.S. side to continue their optimism from the fact that gold is a safe haven away. This year at the gold mine in terms of both the funds and a happy new year also can not say that. In particular, the loss of ETF funds estimated to be between \$ 70-80 billion, while the loss in the mines is between \$ 20-30 billion, it said.

Of the U.S. economy, the Fed's asset purchases to reduce the continuing strong enough to support conclusion that it was with expectations of gold continued to fall, foreign economists for investors gold rush era coming to an end could have öngördü.duk University Professor of International Economics Campbell R. Harvey, "Gold has tumbled 28 percent as of last year. I'm seeing a very small possibility of the rise of gold. Great decline in the price of gold is much more likely," he said.

As of last year, the price performance of gold investors experienced significant losses striking Harvey, "with an atmosphere of confidence in the U.S. economic recovery to continue but under increased price increases previously seen which was the basis eliminates fear. Gold has tumbled 28 percent as of last year. I'm seeing a very small possibility of the rise of gold. Great decline in the price of gold is much more likely," he said.

1000 may see the dollar's gold

and gold prices move in U.S. interest rates, indicating that a close correlation Harveyşun said:

"In light of recent data readily 3 percent to 4 percent of the U.S. interest rates are likely to rise. If this happens, the price of gold falls below \$ 1,000 can see that. Increase in U.S. interest rates is one of the main indicators showing that increased economic power. People become less concerned about the economic environment, gold will continue to decline. Gold demand in India is one of the largest in the two countries as of last year the introduction of restrictions on trade in gold price of gold was effective mainly in low trend.
