Computer and Information Security
(ECE560, Fall 2020, Duke Univ., Prof. Tyler Bletsch)
Pointer to Homework 5

To access Homework 5, you will need to explore public information channels and a few of the ways they can hide information.

To start, use Wikipedia to research what people thought about the 2012 direct-to-DVD movie "Big Top Scooby-Doo!" over the past month or two.

Note: Finding the assignment involves a brief scavenger hunt. Part of it will ask you to go somewhere outside in real life and take a photo of yourself there if you're in town, or to do a virtual visit if you're remote. If you have an accessibility or technological problem that would prevent this, contact the instructor when you get to that point.
