

Thank you very much for your interest in Duke University and/or my work.

If you are interested in working with me, of course, you may contact me. Nevertheless, please be aware that admission is awarded on a competitive basis by a committee. Because of this, the outcome of the admission process cannot be determined without a thorough examination of folders of "all" applicants. In light of this, I am regretful that I cannot help you with determining your chances of being admitted. If you decide that you want to work with me, please apply for admission and kindly point out on your application that you would like to have me as a potential research supervisor.

Also, please note that my research is mainly mathematical. I do NOT build any systems, but make algorithms/mathematical constructions that "may be" used in future systems. You need to be willing to learn more MATH if you want to join my group.

Thank you again for your kind consideration.
