

Vahid Tarokh worked at AT&T Labs-Research until 2000. From 2000-2002, he was an Associate Professor at Massachusetts Institute of Technology (MIT). In 2002, he joined Harvard University as a Hammond Vinton Hayes Senior Fellow of Electrical Engineering and Perkins Professor of Applied Mathematics. He joined Duke University in Jan 2018, as the Rhodes Family Professor of Electrical and Computer Engineering, Computer Science, and Mathematics and Bass Connections Endowed Professor. He was also a Gordon Moore Distinguished Research Fellow at CALTECH in 2018. Since Jan 2019, he has also been named as a Microsoft Data Science Investigator at Duke University.

He has supervised 35 Post-doctoral Fellow and 16 PhD students; about 55% of these are Professors at Research Universities, and the rest are research scientists at various US Government sponsored (Lincoln Labs, NASA), and industry research labs. In addition to these, he has supervised 12 M.S. thesis, one undergraduate thesis, and three M.S. non-thesis students. In the summer of 2016, Dr. Tarokh supervised 6 (underrepresented) High School Summer Student Research on development of tactile gloves and applications while volunteering under a United States Army Education Outreach HSAP Program <https://www.usaeop.com/>. In 2019 and 2020, he supervised summer research of 6 undergraduate students under Duke Rhodes IID DATA+ Program <https://bigdata.duke.edu/data>.
