The Clouds

Translated by William Arrowsmith
with sketches by Thomas McClure
Introduction

The original version of *The Clouds* was presented in March, 423 B.C. at the Great Dionysia, where it disappointed Aristophanes' hopes by being placed third. The First Prize was awarded to the aging Kratinos for his final comedy, *Pytine* (or *The Wineflask*) and the runner-up was Ameipsias with his *Konnos.* After the success of both *Acharnians* and *Knights,* this defeat must have been a bitter blow for Aristophanes. In *Knights* of the year before he had twitted Kratinos with being a doddering drunkard whose comic talents had decayed, and the drunkard had replied by confessing his drunkenness in a play of such comic verve and gaiety—accusing Aristophanes, for instance, of being a mere "Euripidaristophanizing" plagiarist—that he completely defeated his brash young critic. Worse yet, Ameipsias' *Konnos* was, like *The Clouds,* an attack on the sophistic movement, containing a Chorus of Sophists and, evidently, satirizing Sokrates by name. All this might not have mattered had *The Clouds* been a less ambitious play, but Aristophanes regarded it as by far the finest comedy of his career to date.²

Probably in the hope of getting a second hearing—if only from readers—he revised the play, and the version of *The Clouds* which we now possess is not the original of 423 B.C. but a revision carried out some three or four years later. According to the Scholiast, the revision was thorough and extensive changes were made, but the chief alterations affected three sections in particular: the *parabasis,* the *agon* between the two Logoi, and the finale, the burning of the Thinkery. The full extent of these changes cannot be ascertained. In the *parabasis,* the original choral anapests were replaced by a passage whose meter is unique in a

---

1 *Konnos* was the name of Sokrates' music teacher, and it is likely that the play attacked the "New Music."

2 *The Clouds,* 522: "convinced . . . that this play was the finest of my comedies . . . ."
parabasis (a probable indication that the poet had no expectation of seeing the play restaged) and in which Aristophanes takes off the customary choral mask and speaks to his readers directly in the first person. To the agon was added the famous, passionate defense of the Old Education, a speech clearly designed, through its power of conviction and moral seriousness, to show Aristophanes’ critics that what was at stake in this play was nothing less than the fate and future of civilized Athens. About the finale no such certainty is possible, though there is some small reason to believe that in the original version it was the god Hermes, rather than Strepsiades, who fired the Thinkery.

Even in its present form, revised for readers rather than for the stage, The Clouds is visibly a masterpiece, a play of wonderful, ragging satire, tilted so expertly toward the preposterous and the absurd that its effect is wholly and unmistakably comic. We have, in fact, almost a reductio ad absurdum of the satirical intent, satire become so buffa and burlesque that its characters and targets, by sheer exaggeration and incongruity, survive as directly comic. In short, a splendid play, beautifully sustained and shaped, and everywhere guided by Aristophanes’ genius for comic distortion and his cunning of absurdity. If not the funniest play he ever wrote, it is certainly the cleverest: clever in construction and plot, clever in its exploitation of incongruities, clever in polemic and wit. Almost, perhaps, too clever for its own good. But for Aristophanes these very qualities of cleverness and wit were precisely what made The Clouds superior to his own previous work and that of his “cheap and vulgar rivals”: for their slapstick of situation and crude horseplay he here substitutes the ludicrous slapstick of the intellect and the better horseplay of poetry and imagination. In its structure too The Clouds is an improvement. Unusually tight and coherent, at least by Aristophanic standards, its action is all of a piece, a continuously unfolding plot, written to be performed by a small cast, and singlemindedly devoted to the pursuit of its quarry. If it lacks the miraculous violence and vigor of The Knights or the exuberance of The Acharnians, it makes up for those qualities by the greater clarity and economy of its design and the pure lyricism of its poetry. Until The Birds, there is nothing in Aristophanes to match the loveliness of the poetry here assigned to the Chorus of Clouds as it enters. In this play, for the first time, we catch a glimpse of that exquisite tension between slapstick and poetry, the obscene and the sublime, which was Aristophanes’ major individual contribution to comedy and which lies at the heart of his two greatest lyrical comedies, The Birds and The Frogs.

At first blush the improbable victim of The Clouds seems to be the philosopher Sokrates. But actually Aristophanes is deliberately exploiting Sokrates here as a convenient comic representative of the sophistic corruption which is the play’s real subject. In the illustration of that corruption, Sokrates is nothing more than the poet’s cipher, a curious catchpaw of those enormous cultural polarities (Old and New, Tradition and Innovation, Country and City, Peace and War, Poetry and Prose, Custom and Logic, etc.) which Aristophanes loved to elaborate and which he presented in play after play as locked in a life-and-death struggle for the soul of Athens. Whether Aristophanes privately believed that Sokrates was a sophist or presented him that way for its comic and preposterous effect, we shall never know. But for the purposes of the play, Sokrates is merely a genial polemical emblem of the sophistic movement—if that extraordinary simultaneous flowering of individual genius, crankery, “educationism,” and fraud can be called a movement at all. For Aristophanes such distinctions are academic, and to his mind the sophists are a movement only because they are something worse, a conspiracy of charlatans and humbugs. Distinctions of doctrine and belief are totally disregarded. Jumbled together in ludicrous proximity and then stuffed into the mouth of Sokrates are the doctrines of Protagoras, the pre-Socratics generally, Anaxagoras, Diagoras, Gorgias, Prodikos, and perhaps Thrasymachos. It is grotesque—and hilarious. It is polemic on the grand scale, contemptuous of niceties, careless of reputations, unfair, Procrustean, and passionately loyal to its central perception. Addressed to, and exploiting, the average man’s ridiculous stereotype of philosophy and science, it remains an honest and uncompromising play.

Grant Aristophanes his premises, and his logic is ruthlessly consistent. If Sokrates is a symbol of intellectual corruption and fraud, Strepsiades represents the Old Tradition in its corruption. Far from presenting Sokrates as the indispensable corrupter, Aristophanes shows that Strepsiades can be hoodwinked only because he had been corrupted prior to his enrollment in the Thinkery. All Sokrates does is to complete the process—or at least he tries to. But for Aristophanes the Sophists are merely symptoms of the general corruption, not its causes; they stand to education and the life of the mind exactly as Kleo stands to politics and Euripides to tragedy. If the Sophists are strong in being unprincipled, Strepsiades is weak because he is stupid and because the principles and values that might have protected him from his own stupidity have deteriorated. He is essentially only a denser Dikaiopolis become civilized and
decadent; in another context he might have been a peasant hero. But transplanted to Athens from the country, cursed with an expensive aristocratic marriage and a playboy son, he is an Awful Warning on the Perils of the City and the Evils of Imperialism. According to Aristophanes, the process of corruption began with Athenian imperialism and the war fought to maintain the empire. If imperialism brought with it tyranny, luxury, litigation, and the domination of political life by demagogic rhetoric, the war was destroying the very fabric of Athenian life by ravaging the countryside and forcing the evacuation of the country population into the city. There, cut off from the earth and uprooted from the context that gave it life and value, the Old Order had decayed, and with it were being destroyed all those traditions and virtues and decencies which, for a conservative countryman like Aristophanes, were synonymous with Athenian civilization itself. Strepsiades is his comic image of this corruption and Sokrates its aggravating symptom. If the causes were irremediable, he could at least struggle with the symptoms. And no quarter asked or given.

Aristophanes and Sokrates

Why did Aristophanes select Sokrates as his spokesman for the Sophists, and was he guilty of malicious slander and moral irresponsibility in so doing?

By now these two questions have become inextricably bound up with the fortunes of the play which is, ironically, more commonly read as a perverse adjunct to The Sokratic Problem than for its satire of the sophists. No definite answer is possible in the poor state of our evidence, but the questions cannot be shrugged off, and I offer the following considerations for what they may be worth.

1. Plato's charge against Aristophanes is the serious charge of moral irresponsibility. By circulating a distorted image of Sokrates, Aristophanes created, or abetted, those slanders which Plato believed led to Sokrates' death. The official indictment read: "Sokrates is a malefactor who meddles in the matters of the heavens and the earth below, who makes the Worse Argument appear the Better and teaches others to follow his example." And the Platonic Sokrates comments to the jury: "You yourselves have seen these very things in Aristophanes' comedy—a Sokrates who is carried around in a basket and asserts that he walks upon the air and a great many other absurdities, of which I am completely ignorant." We may, if we wish, doubt Plato's interpretation, but presumably the charges are accurately reported, and the implication is clear: the slanders of The Clouds, directly or indirectly, created the formal accusation brought against Sokrates in 399 B.C.

2. But the evidence is partisan and polemical. Plato's account is that of a devoted disciple, not a reporter, and the prejudice of Platonists is almost religious.

3. Sokrates' own reaction, if Plutarch can be trusted, was not that he had been slandered but that he had been teased: "I am twitted in the theater as I would be at a drinking-party."

4. Nonetheless, judging from the available evidence, the caricature of Sokrates in The Clouds is so distorted that it cannot be called a caricature at all. Thus Sokrates refused payment, was not an atheist, had no Thinksery, and never held the doctrines which are here put into his mouth. Worse, he consistently attacked the Sophists and their doctrines. He does, however, admit in the Apology that in his earlier days he had dallied in "scientific" research.

5. That Aristophanes could not have foretold the consequence of his "slanders" is irrelevant. Slander is slander.

6. Aristophanes' private opinion of Sokrates is also irrelevant. In Plato's Symposium, the two men are presented as being on friendly terms, but this does not entitle us to suppose that Aristophanes really admired Sokrates or thought his views anything but pernicious. If it does, then Aristophanes was a hypocrite as well as morally irresponsible.

7. If Aristophanes was really ignorant of Sokrates' beliefs, he is equally culpable. Ignorance is no excuse for slander. But Aristophanes was anything but an ignorant man, and his refusal to allow his Sokrates to make one statement that is recognizably Sokratic seems to me to indicate strategy rather than stupidity.

8. The distortions practiced upon Sokrates are typical and not exceptional. They are, for instance, completely of a piece with Aristophanes' systematic distortion of Euripides; if Euripides' words are quoted against him, they are invariably taken from their context and parodied by willful misunderstanding. But those who are angered by the spectacle of Sokrates mocked have never lifted a finger in defense of Euripides.\footnote{It has even been suggested that The Clouds failed to win First Prize because the audience recognized—and disliked—the distorted image of Sokrates. Given what happened to Sokrates, this seems excessively naive.}

\footnote{De educatione puerorum xiv.}

\footnote{As Speaker of the House Rayburn said in a different context: "It all depends on whose ox is gettin' gored."}
9. In any case, the treatment of Sokrates is not, by Aristophanic standards, harsh or "pitiless satire," as Platonists claim. It is, in fact, surprisingly mild and impersonal. (The savage attack upon Kleon in The Knights is an instructive comparison.) Thus, apart from a couple of gibes at Sokrates' gait and general bathlessness, his personal life is strictly avoided. We hear nothing of the shrewish Xanthippe, nothing of the fashionable pederasty of the Socratic circle (or at least nothing that implicates Sokrates), nothing about Sokrates' midwife-mother (cf. the treatment meted out to Euripides' mother), etc. The charges are wholly professional: Sokrates is a humbug and a charlatan.

10. Aristophanes' "slanders" are, in some real sense, dictated by convention. Comedy is the heir of the early komos, and the komos was a convention whose essential attributes were invective and abuse. Which is to say merely that the Athenian comedian was not merely given license to be abusive, but that abuse was expected of him. And precisely because it was conventional, was expected, it could be discounted as conventional; and presumably those who were ragged were expected to take their ragging in good part—as Sokrates did, though Kleon (and Plato) did not. Needless to say, such a convention makes the notion of "moral irresponsibility" extremely hard to assess.

11. Sokrates is presented as preposterous and this strikes me as cool and deliberate strategy—doubtless sustained by malice and even a little contempt. There is, after all, a kind of humor—the kind of humor of the komos, I suspect—which contrives its fun out of a total inversion of the truth. Because the humor is conventional, the exaggeration is understood as exaggeration and the humorist's success consists in the very size and absurdity of the distortion. The comedy lies in the disparity between the known truth and the degree of distortion achieved. This explanation might be less acceptable if it were not for the fact that Aristophanes is, of all comedians, the master of the incongruous, and that the stunning distortion is everywhere his stock-in-trade.

12. If Aristophanes has not made Sokrates preposterous because the preposterousness was funny, he has done so out of dislike and the conviction that Sokrates was dangerous. In this he was probably mistaken, but Aristophanes was a man in the livery of an Idea, and if Sokrates is distorted or satirized in the service of that Idea, it is regrettable but not culpable. Ideas distort the world and those who serve them. Platonists should understand.

Text and Acknowledgments

The texts which I have used as a basis of this translation are primarily those of Cantarella and Coulon, and I am, like every other translator of Aristophanes, indebted to B. B. Rogers' splendid notes and commentaries on individual passages. To both the University of California at Riverside and the University of Texas I owe my thanks for generous grants for the preparation of the manuscript. For help and encouragement and criticism, I am indebted to a great many people, but particularly to Douglass Parker and to my wife.

SLAVES, STUDENTS, WITNESSES, etc.
SCENE: A street in Athens. On the left, the house of Strepsiades,* an old farmer compelled by the war to leave the country and take up residence in Athens; on the right the tiny, grubby, ramshackle hovel which houses Sokrates' Thinkery. On the extreme left a statue of Poseidon. Before Strepsiades' house stands a Herm, a bust of the god Hermes supported by a square pillar; in front of Sokrates' house, balancing the Herm, stands a potbellied stove with a long tapering flue and a placard which reads: MODEL OF THE UNIVERSE ACCORDING TO THE CONVECTION PRINCIPLE.

Two cots are placed before Strepsiades' house, one occupied by Strepsiades himself, the other by Pheidippides. Huddled on the ground nearby lie several loudly snoring slaves. The time is just before dawn.

STREPSIADES

Thrashing restlessly, then throwing off his blankets and sitting bolt upright. He yawns.

Yaaahhhuuuuu.

Great Zeus Almighty, what an endless monster of a night it's been! Won't the daylight ever come? I could have sworn I heard the roosters crowing hours ago.

And listen to those slaves. Still snoring away!

By god, things around here were a long sight different in the good old days before this war! Drat this stinking war anyway! It's ruined Athens. Why, you can't even whip your own slaves any more or they'll desert to the Spartans.*

Bah.

Pointing to Pheidippides.

And as for him, that precious playboy son of mine, he's worse yet.

Look at him, stretched out there sleeping like a log under five fat blankets, farting away.

—All right, if that's the way you want it, boy, I'll snuggle down and fart you back a burst or two.

He burrows under the blankets for a moment, then throws them off and sits up again.

DAMN!
I'm so bitten up by all these blasted bedbuggering debts and bills and stable-fees, I can't catch a wink.

Turning on Pheidippides.

And all because of YOU!

Gigs, rigs, nags, ponytails* . . . Hell, horses everywhere! Horses in your dreams!

But me?

I'm bankrupt, broke, ruined, waiting for the end of the month when all these debts come due.

Savagely kicking Xanthias awake.

—You. You there, light me a lamp and bring me my ledger.

The slave rises, lights a flickering lamp, and brings him the ledger.

Now then,

I'll just run over this account of my debts and see how much I owe.

Hmmm.

Reading aloud.

TO PASHIAS: THE SUM OF THREE HUNDRED—

Three hundred to Pasias? What in god's name for?

Of course. I remember. That gelding I bought him. Idiot!

Better I should have gelded myself.

PHEIDIPPIDES

Shouting in his sleep.

PHILO,

YOU FOULED ME! KEEP IN YOUR OWN LANE!

STREPSIADES

That's the horsey blight that has blasted me dead.

Even in his dreams he thinks he's winning the derby.

PHEIDIPPIDES

In his sleep.

HOW MANY LAPS FOR THE STEEPLECHASE?

STREPSIADES

Laps, is it?

Resuming his accounting.

Let's see now. What's the next entry after Pasias?

Reading aloud.

TO AMYNIAS: FOR GIG, BODY AND WHEELS INCLUDED, THE SUM OF—

PHEIDIPPIDES

In his sleep.

ROLL THE HORSE IN THE DUST, TRAINER, AND THEN STABLE HIM.

STREPSIADES

You've rolled me out of house and home, damn you!

I've lost two or three lawsuits on your account and now the other creditors are clamoring for confiscation.

PHEIDIPPIDES

Waking up crossly.

Damn it, Dad, why do you have to thrash around like this all night long?

STREPSIADES

Because there's a bumbailiff* in the mattress biting me, that's why.

PHEIDIPPIDES

Oh, for god's sake, let me sleep, will you?

STREPSIADES

Go on, damn you, sleep! But I give you warning, boy. Someday these debts will land on your head.

Pheidippides' only answer is a snore.

By god,

I hope that meddling matchmaker who prodded me on to marry your mother dies a nasty death!

I used to be a farmer—the sweetest life on earth, a lovely, moldy, unspruce, litter-jumbled life, bursting with honeybees, bloated with sheep and olives. And then, poor hick, what did I do but marry your mother, a city girl, and niece of that Megakles who was son and heir of old Blueblood Megakles* himself? She was a pretty piece: Miss Megakles-de-luxe.

Well, so we got married and we clambered into bed—me, a stink of wine-leeps, fig-boxes, and wool-fat; she, the whiff of spices, pure saffron, tonguekisses, Luxury, High Prices, gourmandizing, goddess Lechery, and every little elf, imp, and sprite of Intercourse.
But I'll say this for your mother: she was a worker. Nothing slow about her. All day long she'd sit there working away at her loom and shoving in the wool, and then in bed at night she'd work on me for more.

Expense meant nothing. Clipped?

"Madam," I said, "what do you think I am? A man or a goat?"

_Suddenly the oil lamp sputters and goes out._

_XANTHIAS_

There's no oil left in the lamp.

_STREPSIADES_

Jackass! And why in god's name did you light that guzzler of a lamp? Come here and be whipped.

_XANTHIAS_

But why? What have I done?

_STREPSIADES_

Because you put in pot-bellied wicks, that's why.

_He lunges at Xanthias who ducks away and disappears into the house._

Anyway, when that darling brat of ours was born to the missus and me, we immediately started squabbling over his name. She, of course, wanted something fancy, some upperclass, high-horse handle with _hippos_ in it— _Xanthippos_ or _Charippos_ or _Kallippides_—while I naturally wanted to give him the fine old name of _Pheidonides_ in honor of his thrifty grandfather. Well, we haggled and at last agreed on a compromise name: _Pheidippides_.

She used to gush over the baby: "Just imagine. Someday he'll be an important man, just like his Uncle Megakles, and drive in his purple robes up to the Akropolis." And I'd put in: "Ha, drive his goats from the hills, you mean, dressed like his dad in a filthy smock."

Well, needless to say, he paid no heed to me and now he's ended up by squirting his dirty horse-pox all over my money.

Anyway, after beating my brains all night long, I think I've finally found a way, the only way out, a wonderful little chink of a loophole. Now if I can only shove him through it, I'm saved. But first I've got to find some way of waking him up. I wonder what's the nicest way to wake up.

_Hmmmm._

_Cooing in Pheidippides' ear._

_Pheidippides._

_Little Pheidippides._

_Pheidippides_

_Waking angrily._

Damn it, Dad, what now?

_STREPSIADES_

Give your Old Man a kiss. There, now your hand, son.

_Pheidippides_

Look here, what's this all about?

_STREPSIADES_

Tell me, my boy, are you really fond of your poor old father?

_Pheidippides_

Sure, Dad.

I swear it. So help me Poseidon.

_STREPSIADES_

No, NOT THAT!

For god's sake, none of those horse-god oaths* of yours! Poseidon indeed! That god's the cause of all my troubles. But if you really love me, my boy, I beg you, implore you, do what I ask.

_Pheidippides_

Depends. What are you asking?

_STREPSIADES_

Reform yourself, boy. Change your whole way of life. Follow my advice and make a new man of yourself. A fresh Pheidippides.
PHEIDIPPIDES

But how?

STREPSIADES

First promise.

PHEIDIPPIDES

Reluctantly.

STREPSIADES

I promise.

PHEIDIPPIDES

So help me—Dionysos.

STREPSIADES

Good. Now then, look over there.

Do you see that dirty little hovel with the dinky door?

PHEIDIPPIDES

Yes. But what are you driving at, Dad?

STREPSIADES

Awesome.

My boy,

that little hovel is the Thinkery. Intellectuals live there,

professors who will teach you—and what's more, prove it—

that the whole atmosphere is actually a Cosmical Oven*

and we're not really people but little bits of charcoal

blazing away. What's more—for a fee,* of course—

they offer a course called The Technique of Winning Lawsuits.*

Honest or dishonest, it's all one.

PHEIDIPPIDES

Who are they?

STREPSIADES

Great Scholars. Scientists.

PHEIDIPPIDES

Fine. Who are they?

STREPSIADES

Gentlemen. Men of Learning.

PHEIDIPPIDES

Yes, but what are their names?

STREPSIADES

Why . . .
Pheidippides

won't let me go horseless for long. I'll go to him. The hell with you.

Exit Pheidippides.

Strepsiades

I'm down, but not for long.
First I'll say a little prayer to the gods, and then I'll go and enroll at the Thinkery myself. But whoa:
at my age the memory is bad, the intellect dull. How could I ever master that hair-splitting logic? Still, I have to go, so why am I dawdling here instead of banging on the door?

He walks over to Sokrates' house and kicks at the door.

—Hey, porter!

Student

From within.

Go bang yourself.

Opening the door.

Who are you to kick our door?

Strepsiades

Strepsiades, son of Pheidon. From Kikynna.

Student

By god, the way you come here and kick in our door I think your name should damn well be Stupidities. Do you realize that you've just caused the miscarriage* of a great scientific discovery?

Strepsiades

Humbly apologetic.

Oh, please excuse me. I didn't realize. You see, I come from the country. But tell me, what discovery miscarried?

Student

It's top secret. Classified information. Access only to students.

Strepsiades

You can tell me then. That's why I've come here, to be a student at the Thinkery.

Student

In that case, very well. But remember, our researches are solemn mysteries.

Whispering.

Just a minute ago Sokrates was questioning Chairephon about the number of fleafeet a flea could broadjump. You see, a flea happened to bite Chairephon on the eyebrow and then vaulted across and landed on Sokrates' head.

Strepsiades

How did he measure it?

Student

A stroke of absolute genius. First he melted some wax. Then he caught the flea, dipped its tiny feet in the melted wax, let it cool, and lo! little Persian bootees. He slipped the bootees off and measured the distance.

Strepsiades

Lord Zeus, what exquisite finesse of mind!

Student

Elementary really. You haven't heard anything yet. Would you like another sample?

Strepsiades

Oh, I'd like that. Go on.

Student

Well, it seems that Chairephon was asking Sokrates which of two theories he held: that gnats tooted through their mouths or, in reverse, through their tails.

Strepsiades

Gosh. Go on. What was his theory about the gnat?

Student

According to him, the intestinal tract of the gnat is of puny proportions, and through this diminutive duct the gastric gas of the gnat is forced under pressure down to the rump. At that point the compressed gases,
as through a narrow valve, escape with a whoosh, thereby causing the characteristic tootle or cry of the flatulent gnat.

STREPSIADES  So the gnat has a bugle up its ass!
O thrice-blessed mortals! What bowel-wisdom!
Why, the man who has mastered the ass of the gnat could win an acquittal from any court!

STUDENT  And you know,
just the other day he was cheated of an immense discovery because of a lizard.

STREPSIADES  Cheated by a lizard? But how?

STUDENT  It happened at night, during the course of his researches on the orbit of the moon. There he stood, gaping wide-mouthed at the sky, when a lizard on the roof let loose on him.

STREPSIADES  Ha! A lizard crapping on Sokrates! That's rich.

STUDENT  And last night there was nothing in school to eat.

STREPSIADES  how did he ever manage your supper?

STUDENT  A combination of science and legerdemain.

STREPSIADES  He quickly sprinkled the table with a fine film of powderlike ashes. Then, deftly bending a skewer in the shape of a compass he drew a vast arc along whose perimeter the hook of his compass encountered somebody's cloak. Quickly flicking his hand, he pulled back compass and catch. He pawned the cloak; we ate the proceeds.

STREPSIADES  Why, Thales himself was an amateur compared to this!

Throw open the Thinkery! Unbolt the door and let me see this wizard Sokrates in person. Open up! I'm MAD for education!

The ekkyklema is wheeled about to show the whole interior court of Sokrates' Thinkery. High overhead the crane supports Sokrates in his basket busily scanning the heavens. Hanging on the walls of the Thinkery are various charts, maps, instruments, etc. In the center of the courtyard stand a number of utterly pale, emaciated students deeply engaged in a rapt contemplation of the ground.

Great Herakles,
what kind of zoo is this?

STUDENT  What's so strange about it?

STREPSIADES  Spartan prisoners from Pylos.* But why are they all staring at the ground?

STUDENT  They're engaged in geological research:* a survey of the earth's strata.

STREPSIADES  Of course. Looking for truffles.

To one of the students.
—You there, don't strain yourself looking. I know where they grow big and beautiful.

Pointing to other students who are bent completely double.
Hey, and look there:
what are those fellows doing bent over like that?

STUDENT  Those are graduate students doing research on Hades.

STREPSIADES  On Hades? Then why are their asses scanning the skies?

STUDENT  Taking a minor in Astronomy.
To the students.

—Quick, inside with you.

Hurry, before the Master catches you.

STREPSIADES

No, wait.

Let them stay a little longer. I want to speak to them on a *private* matter.

STUDENT

Impossible. The statutes clearly forbid overexposure to fresh air.

The students disappear through a door at the rear.
Strepsiades meanwhile is staring at the various maps and instruments on the walls.

STREPSIADES

*Pointing to a chart.*

In the name of heaven, what's that?

STUDENT

That's for astronomy.

STREPSIADES

*Pointing to surveying instruments.*

And what are those?

STUDENT

They're for geometry.

STREPSIADES

Geometry? And what's that good for?

STUDENT

Surveying, of course.

STREPSIADES

Surveying what? Lots?

STUDENT

No. The whole world.

STREPSIADES

What a clever gadget!

And as patriotic as it is useful.*
STUDENT

Pointing to a map.

Now then, over here we have a map of the entire world. You see there? That’s Athens.

STREPSIADES

That, Athens? Don’t be ridiculous. Why, I can’t see even a single lawcourt in session.*

STUDENT

Nonetheless, it’s quite true. It really is Athens.

STREPSIADES

Then where are my neighbors of Kikynna?

STUDENT

Here they are. And you see this island squeezed along the coast? That’s Euboia.

STREPSIADES

I know that place well enough. Perikles squeezed it dry.* But where’s Sparta?

STUDENT

Sparta? Right over here.

STREPSIADES

That’s MUCH TOO CLOSE! You’d be well advised to move it further away.

STUDENT

But that’s utterly impossible.

STREPSIADES

You’ll be sorry you didn’t, by god.

_STREPSIADES catches sight of Sokrates in his basket overhead._

Look: who’s that dangling up there in the basket?

STUDENT

Himself.

STREPSIADES

Who’s Himself?

STUDENT

Sokrates.

STREPSIADES

SOKRATES!

Then call him down. Go on. Give a great big shout.

STUDENT

_Hastily and apprehensively taking his leave._

Er . . . you call him. I’m a busy man.

Exit Student.

STREPSIADES

O Sokrates!

_No answer from the basket._

Yoohoo, Sokrates!

SOKRATES

From a vast philosophical height.

Well, creature of a clay?

STREPSIADES

What in the world are you doing up there?

SOKRATES

Ah, sir,

I walk upon the air and look down upon the sun from a superior standpoint.

STREPSIADES

Well, I suppose it’s better that you scner at the gods from a basket up in the air than do it down here on the ground.

SOKRATES

_Precisely. You see,_

only by being suspended aloft, by dangling my mind in the heavens and mingling my rare thought with the ethereal air, could I ever achieve strict scientific accuracy in my survey of the vast empyrean. Had I pursued my inquiries from down there on the ground, my data would be worthless. The earth, you see, pulls down the delicate essence of thought to its own gross level.

_As an afterthought._

Much the same thing happens with watercress.
STREPSIADES

Ecstatically bewildered.

You don't say?

Thought draws down . . . delicate essence . . . into watercress.
O dear little Sokrates, please come down. Lower away,
and teach me what I need to know!

Sokrates is slowly lowered earthwards.

SOKRATES

What subject?

STREPSIADES

Your course on public speaking and debating techniques.
You see, my creditors have become absolutely ferocious.
You should see how they're hounding me. What's more, Sokrates,
they're about to seize my belongings.

SOKRATES

How in the world
could you fall so deeply in debt without realizing it?

STREPSIADES

How?

A great, greedy horse-pox ate me up, that's how.
But that's why I want instruction in your second Logic,
you know the one—the get-away-without-paying argument.
I'll pay you any price you ask. I swear it.
By the gods.

SOKRATES

By the gods? The gods, my dear simple fellow,
are a mere expression coined by vulgar superstition.
We frown upon such coinage here.

STREPSIADES

What do you swear by?

Bars of iron, like the Byzantines?*

SOKRATES

Tell me, old man,
would you honestly like to learn the truth, the real truth,
about the gods?

STREPSIADES

By Zeus, I sure would. The real truth.

SOKRATES

And also be admitted to intercourse with their Serene Highnesses,
our goddesses, the Clouds?

STREPSIADES

Intercourse with real goddesses?

SOKRATES

Oh yes, I'd like that.

STREPSIADES

Very well. First, however,
you must take your seat upon the mystical couch.*

SOKRATES

And now we place this sacrificial wreath on your head.

STREPSIADES

A sacrificial wreath?

SOKRATES

Hey, NO!
Please, Sokrates,
don't murder me like poor Athamas* in Sophokles' play!

SOKRATES

Athamas was saved. You must mean Phrixos.

STREPSIADES

Phrixos—so who's a critic? Dead is dead.

SOKRATES

Courage, gaffer. This is normal procedure, required
of all our initiates alike.

STREPSIADES

Yeah? What's in it for me?

SOKRATES

Sprinkling Strepsiades from head to toe with ritual
flour.

You shall be reborn, sir, as the perfect flower of orators,
a consummate, blathering, tinkling rascal.

STREPSIADES

That's no joke.

SOKRATES

I'll be all flour the way you're powdering me.
SOKRATES
Silence!
Holy hush command your tongue. Listen to my prayer.
He stretches out his hands to heaven and prays.
O Lord God Immeasurable Ether, You who envelop the world!
O Translucent Ozone!
And you, O lightningthundered holy Clouds!
Great Majesties, arise!
Reveal yourselves to your Sophist's eyes.

STREPSIADES
Whoa, ladies, don't rain yet. Don't get me wet. Let me wrap up.
He wraps his head in his tunic.
What a damned fool! Coming without a hat.
SOKRATES
Come forth, be manifest, majestic Clouds! Reveal your forms to me.
And whether on Olympos' snow your brooding eyrie lies,
or on the waves you weave the dance with Ocean's lovely daughters,
or dip your golden pitchers in the waters of the Nile,
or hover on Mount Mimas' snows, or over Lake Maiotis—
come forth, great Clouds!
Accept our prayers! O hear us!

Amen.

From far off in the distance the Clouds are heard singing. As they slowly approach Athens, the singing increases steadily in volume as it rises in pitch.

CHORUS
Rise and soar eternal Clouds!
Lift your loveliness of rain, in sodden splendor come!
Soar from ocean's sullen swell, rise higher to the peaks, to the tall cliffs and trees!
Rise and soar, while far below, earth and shining harvest lie, sound of god in river water, blessed ocean at its roar.

Arise!
For Ether's sleepless eye now breaks with blazoned light!
Shake loose the rain, immortal forms, and walk upon the world!

A sustained burst of thunder is heard.

SOKRATES
O Clouds consummately blest, how clearly thy answer rumbles!

To Strepsiades.
—Did you hear that thunder crack, that basso profundo peal?

STREPSIADES
All hail your holyships! What a nasty jolt you gave me! What a ratatat! You scared me so I've got to thunder too.

He breaks wind.
Sacrilege or not, I'VE GOT TO CRAP!

SOKRATES
Silence, boor!
No more of your smut. Leave filth like that to the comic stage.

A short low growl of thunder is heard.
Shhh.
Quiet.
The goddess swarm is stirring to its song.

CHORUS
Virgins of rain, look on Pallas' shining earth, this oil-anointed land, country of Kekrops' hero-breeding plain! Holiness is here, home of the mysteries, whose unrevealable rites sanctify the soul. And here the gods have gifts. Below the splendid gables go processions of the blest, and every season sees its festivals, its crowns.
And early every Spring
Dionysos brings his joy,
the weaving of the dance,
the Muses and the flutes.

STREPSIADES
Holy Zeus, Sokrates, who were those ladies that sang
that solemn hymn? Were they heroines of mythology?

SOKRATES
No, old man.
Those were the Clouds of heaven, goddesses of men of leisure
and philosophers. To them we owe our repertoire of verbal talents:
our eloquence, intellect, fustian, casuistry, force, wit,
prodigious vocabulary, circumlocutory skill—

STREPSIADES
Suddenly carried away in cloudy inspiration.

I suddenly tingled all over—as though I were carried up,
buoyant, exalted, swollen somehow with the flatus of philosophy:
a mist of verbal fluff, a sudden unsubstantial swelling,
a timid bubble of wrangling words, a windbag of debate!
I seemed rent by lightning speech, ah, the thrust and parry
of opinion, of minds massively meeting . . .

In short, Sokrates,
if I could see those ladies in person, I'd LOVE to.

SOKRATES
Then look over toward Parnes. I can see them settling down
ever so gently.

STREPSIADES
Look: just offstage.

SOKRATES
Where?

STREPSIADES
There, a vast drifting swarm
nuzzling along through woods and valleys.

SOKRATES
Rubbing his eyes.
I can't see them.

STREPSIADES
I wonder what's wrong.

SOKRATES
Look: just offstage.

STREPSIADES
Now I see them!

SOKRATES
You've got cataracts, friend, if you can't see them now.

STREPSIADES
Slowly and majestically, the Chorus of Clouds files
in and takes up its position in the orchestra.

SOKRATES
Ooh, what venerable ladies! They take up all the space.

STREPSIADES
And you actually mean to say that it's never occurred to you
that the Clouds of heaven were goddesses?

STREPSIADES
By Zeus, it's news to me.
I always used to think they were just fog and drizzle and mist.

SOKRATES
Clearly then you must also be ignorant of the fact that the Clouds
are also patrons of a varied group of gentlemen, comprising:
chiropractors, prophets, longhairs, quacks, fops, charlatans,
fairies, dithyrambic poets, scientists, dandies, astrologers,
and other men of leisure. And because all alike, without exception,
walk with their heads among the clouds and base their inspiration
on the murky Muse, the Clouds support them and feed them.

STREPSIADES
I see.

SOKRATES
That's why they write*—
O downblow, dazed, of the sodden skies!
and
Ho, tresses of the Typho-headed gale! Ho, puffcheek squalls!
or
Spongy humus of the hyaline!
and
Hail, ye heaven-scudders,
sudden ospreys of the winds!
and
Come, ye wheeling cumuli,
ye clammy condensations, come!
And in return, these poets
gorge themselves on the flesh of the mullet and eat of the breast
of the thrush?
SOKRATES
And why not?

STREPSIADES
But what I want to know is this:
why, if these ladies are really Clouds, they look like women?
For honest clouds aren't women.

SOKRATES
Then what do they look like?

STREPSIADES
I don't know for sure. Well, they look like mashed-up fluff,
not at all like women. No, by Zeus. Women have . . . noses.

SOKRATES
Would you mind if I asked you a question or two?

STREPSIADES
Go right ahead.

SOKRATES
Haven't you sometimes seen a cloud that looked like a centaur?
Or a leopard perhaps? Or a wolf? Or a bull?

STREPSIADES
Often. So what?

SOKRATES
Well, the Clouds assume whatever shape they wish. Now suppose
they happened to meet some shaggy, hairy beast of a man—
Hieronymos, for instance; instantly they turn into wild centaurs
as a caricature of his lust.

STREPSIADES
I see. But what if they run into Simon,
that swindler of government funds?

SOKRATES
Presto, they turn into wolves
and catch his likeness to a T.

STREPSIADES
Oh, I see. And yesterday
because they met that coward Kleonymos, they turned into deer?

SOKRATES
Precisely. And just now, when they saw Kleisthenes in the audience,
they suddenly turned into women.
Welcome, queens of heaven!
I implore you, speak to me!

A great burst of thunder.

Sokrates cowers with fright.

Koryphaios
Hail, superannuated man!

To Sokrates.

And hail to you, O Sokrates, high priest of poppycock!
Inform us what your wishes are.
For of all the polymaths on earth, it's you we most prefer—you and Prodikos. Him we love for wisdom's sake, but you, sir, for your swivel-eyes, your barefoot swagger down the street, because you're poor on our account and terribly affected.

Sokrates
These are the only gods there are. The rest are but figments.

Sokrates
Zeus?
What Zeus?
Nonsense.

There is no Zeus.

Then who makes it rain? Answer me that.

Sokrates
Why, the Clouds,
What's more, the proof is incontrovertible.

For instance, have you ever yet seen rain when you didn't see a cloud? But if your hypothesis were correct, Zeus could drizzle from an empty sky

while the clouds were on vacation.

Sokrates
By Apollo, you're right. A pretty proof.
And to think I always used to believe the rain was just Zeus pissing through a sieve.

All right, who makes it thunder?

Sokrates
The Clouds again, of course. A simple process of Convection.

Sokrates
I admire you, but I don't follow you.

Sokrates
Listen. The Clouds are a satureate water-solution. Tumescence in motion, of necessity, produces precipitation. When these distended masses collide—boom!

Fulmination.

Sokrates
But who makes them move before they collide? Isn't that Zeus?

Sokrates
Not Zeus, idiot. The Convection-principle!

Sokrates
Convection? That's a new one.
Just think. So Zeus is out and convection-principle's in.

Tch, tch.

But wait: you haven't told me who makes it thunder.

Sokrates
But I just finished telling you! The Clouds are water-packed; they collide with each other and explode because of the pressure.

Sokrates
And what's your proof for that?

Sokrates
Why, take yourself as example. You know that meat-stew the vendors sell at the Panathenaea? How it gives you the cramps and your stomach starts to rumble?
by Apollo! I remember. What an awful feeling! You feel sick and your belly churns and the fart rips loose like thunder. First just a gurgle, papapax; then louder, papapaPApAXapaX, and finally like thunder, PAPAPApaPAXAPPAPAaPaxapap!

Yes.

Sokrates

Precisely. First think of the tiny fart that your intestines make. Then consider the heavens: their infinite farting is thunder. For thunder and farting are, in principle, one and the same.

Strepsiades

Then where does lightning come from? And when it strikes why is it that some men are killed and others aren't even touched? Clearly it's got to be Zeus. He's behind it, blasting the liars with bolts of lightning.

Sokrates

Look, you idiotic Stone-Age relic, if Zeus strikes the liars with lightning, then why on earth is a man like Simon still alive? Or Kicynmos? Or Theoros? They're liars ten times over.

But no. Instead of doing that, he shatters his own shrines, blasts the holiest place names in Homer and splinters the great oaks. And why, I ask you? Have you ever heard of an oak tree committing perjury?

Strepsiades

Say, you know, you've got something there. But how do you explain the lightning?

Sokrates

Attend.

Illustrating his lecture by means of the potbellied-stove Model of the Universe.

Let us hypothesize a current of arid air ascending heavennwards. Now then, as this funneled flatus slowly invades the limp and dropical sacks of the Clouds, they, in turn, begin to belly and swell, distended with gas like a child's balloon when inflated with air. Then, so prodigious become the pressures within that the cloud-casings burst apart, exploding with that celestial ratatat called thunder and thereby releasing the winds. These, in turn, whizz out at such incalculable velocities that they catch on fire.

Result: lightning.

Strepsiades

The very same thing that happened to me at the great feast of Zeus!

I was roasting myself a sausage and forgot to slit the skin. Well, suddenly it bloated up and SPLAT! —singed my eyebrows off and splattered my face with guts.

Chorus

—Ah, how he hungers after learning!

To Strepsiades.

—Sir, if you can pass our test, we guarantee that you shall be —the cynosure of Hellas.

—Our requirements are these: —First, is your memory keen?

—Do you hanker for researching? —Are you subject to fatigue from standing up or walking?

—Does winter weather daunt you?

—Can you go without a meal?

—Abstain from wine and exercise?

—And keep away from girls?

—Last, do you solemnly swear adherence to our code?

—To wrangle —niggle —haggle —battle

—a loyal soldier of the Tongue, conducting yourself always like a true philosopher.

Strepsiades

Ladies, if all you require is hard work, insomnia, worry, endurance, and a stomach that eats anything, why, have no fear. For I'm your man and as hard as nails.
SOKRATES

And you promise to follow faithfully in my path,
acknowledging no other gods but mine, to wit, the ‘Trinity—
GREAT CHAOS, THE CLOUDS, and BAMBOOZLE?

STREPSIADES

If I met
another god,
I'd cut him dead, so help me. Here and now I swear off
sacrifice and prayer forever.

KORYPHAIOI

Then, Sir, inform us boldly
what you wish. Providing you honor and revere the Clouds
and faithfully pursue the Philosophical Life, you shall not fail.

STREPSIADES

Ladies, I'll tell you.
My ambition is modest, a trifling favor.
Just let my muscular tongue outtrace the whole of Hellas
by a hundred laps.

KORYPHAIOI

Sir, you may consider your wishes granted.
Never, from this time forth, shall any politician in Athens
introduce more bills than you.

STREPSIADES

But I don't want to be a Senator!
Listen, ladies: all I want is to escape the clutches
of my creditors.

KORYPHAIOI

Your wishes are modest; we grant them.
And now, Candidate, boldly commit yourself to the hands
of our ministers.

STREPSIADES

Ladies, you've convinced me completely. Anyway,
thanks to my thoroughbreds, my son, and my wife, I have no choice.

So I hereby bequeath you my body,
for better, dear girls, or worse.
You can shrink me by slow starvation;
or shrivel me dry with thirst.

You can freeze me or flay me skinless;
thrust me as hard as you please.
Do any damn thing you've a mind to—
my only conditions are these:

that when the ordeal is completed,
a new Strepsias rise,
renowned to the world as a WELsher,
famed as a TELLer of lies,
a CHEATER,
a BASTARD,
a PHONEY,
a BUM,

SHYSTER,
MOUTHPIECE,
TINHORN,
SCUM,

STOOLIE,
CON-MAN,
WINDBAG,
PUNK,

OILY,
GREASY,
HYPOCRITE,
SKUNK,

DUNGHILL,
SQUEALER,
SLIPPERY SAM,

FAKER,
DIDDLER,
SWINDLER,
SHAM,

—or just plain Lickspittle.

And then, dear ladies, for all I care,
Science can have the body,
to experiment, as it sees fit,
or serve me up as salami.

Yes, you can serve me up as salami!
KORYPHAIOS
Ah, here's a ready spirit, undaunted, unafraid!
—Sir,
complete your course with us and you shall win a glory
that towers to heaven.

STREPSIADES
Could you be a little more specific?

KORYPHAIOS
You shall pass your entire existence up in the air, among us,
strolling about with your head in the Clouds. Your life
shall be the envy of all mankind.

STREPSIADES
Ah, when shall I see that day?

KORYPHAIOS
Before long thousands of clients will stampede to your doors,
begging, pleading, imploiring your service and advice
in all their lawsuits—many involving incredible sums.
I say no more.
—And now, Sokrates, take this old candidate
and test his worthiness to undergo the solemn rites of initiation.
Examine his mental powers; probe his mind and sift him.

SOKRATES
Now then, tell me something about yourself.
The information is essential if I'm to know
what strategies to employ against you.

STREPSIADES
Strategies?
What do you think I am? A military objective?

SOKRATES
No. I'm merely attempting to ask a few questions.
First, is your memory keen?

STREPSIADES
Well, it is and it isn't.
If a man owes me money, I never seem to forget it.
But if I do the owing, I somehow never remember.

SOKRATES
Well, perhaps you have some talents for speaking?

STREPSIADES
No, no talent for talk. But for larceny, lots.

SOKRATES
But how can you possibly learn?

STREPSIADES
I'll manage somehow. Don't you worry.

SOKRATES
But look: suppose I toss you
some tidbit of higher wisdom? Could you catch it
on the fly?

STREPSIADES
What do you take me for? A puppydog
snapping up wisdom?

SOKRATES
No, a beastly old ignoramus.
In fact, I'm afraid we'll have to whip our wisdom
into your hide.
Hmm.
Tell me, suppose someone
gave you a thrashing, what would you do?

STREPSIADES
Why,
I'd take my thrashing. Then after a little while
I'd hunt up a witness, and then a little while later
I'd bring suit for Assault and Battery.

SOKRATES
All right, old man.
undress.

STREPSIADES
Undress? But why? Have I said something wrong?

SOKRATES
No, no. But we require all candidates for initiation
to strip naked.

STREPSIADES
But I'm not a burglar, * Sokrates.
Here, search me if you want.
SOKRATES
What do you think I am?
A policeman? This is a solemn philosophical initiation.
So stop your idiot blather and get undressed.

STREPSIADES
Starting to undress with extreme reluctance.

No, wait.
First answer me this. If I study very hard
and pay attention in class, which one of your students
will I look like?

SOKRATES
Why, you'll be the spitting image of—
Chairephon.

STREPSIADES
CHAIREPHON! But he's a walking cadaver.
I'll graduate a corpse.

He feverishly whisks his cloak back on.

SOKRATES
Damnation! Stop this stalling
and GET UNDRESSED!
He pulls off Strepsiades' cloak and shoves him bodily
toward the black cavelike opening at the rear of
the Thinkery.

Forward, Candidate!

STREPSIADES
NO! WAIT!
I'm scared. Brr, it's as dark as a snakepit down there.
Give me a honeycake to throw to the snakes, Sokrates,
or they'll eat me alive.

SOKRATES
Forward, fool. No hesitation now!

Chorus
Farewell, brave soul,
and may your future gleam as bright
as shines your courage now!
May all good fortune come to you
who, sunk in bitter age,
in the somber twilight of your years,
stride forth, undaunted, unafraid,
toward that uttermost frontier of thought
where wisdom lures you on,
O pioneer!

The Chorus turns sharply and faces the audience.
From the wing appears the poet, the bald Aristophanes;
he strides forth and addresses the audience directly.

ARISTOPHANES
Gentlemen, in the name of Dionysos to whom I owe my nurture as
a poet,
I intend to confront you with my personal complaints, frankly
and freely,
as a poet should.

My ambitions, of course, are very simply stated:
the First Prize and a reputation for talent and wit.

Accordingly,
firmly convinced that this audience was composed of men of taste,
and that this play, THE CLOUDS, was the finest of my comedies to
date,
I submitted an earlier version, expecting your pleasure and approval.
It cost me enormous anguish and labor, and yet I was forced to with-
draw,
ignobly defeated by cheap and vulgar rivals. My present reproaches,
needless to say, are aimed at those self-styled critics and wits
for whom this revision has been made.

However, to the men of true
taste
among you, I say this: I am, as always, your faithful friend,
and never will I willingly or knowingly abandon you or reproach you.
After all, I still remember that glorious day when the Judges—
men of whose extraordinary taste and discrimination it is a joy to
speak—
awarded the First Prize to my youthful comedy, The Banqueters.
Now at that time, gentlemen, my Muse was the merest slip of a girl,
a tender virgin who could not—without outraging all propriety—
give birth. So I exposed her child, her maiden effort, and a stranger rescued the foundling.* But it was you, gentlemen, whose generous patronage nourished my offspring, and I have never since doubted those tokens of your exquisite taste.

And now, gentlemen, like Elektra in the play,* a sister-comedy comes in search of you today, hoping to find those same tokens of recognition. Let her so much as glimpse a single curl from her brother’s head, and she will know her own, as I shall know the tokens of your approval.

She’s a dainty play. Observe, gentlemen, her natural modesty, the demureness of her dress, with no dangling thong of leather,* red and thick at the tip, to make the small boys snigger. Note too her delicate refinement—her refusal to indulge in cheap cracks at the expense of baldness, and the quiet dignity of her dancing, with nothing salacious about it. Observe the absence of farcical slapstick and sensational situations. Here you see no poor old man dubbing his opponents with a stick in a futile attempt to hide the abysmal poverty of his verses. Nor does she fling herself on stage with tragic torches blazing and bloodcurdling fustian. No, gentlemen, my comedy comes to you relying upon herself and her poetry.

This is what she is, and I am the poet, her adoring father. Now I may be baldheaded (as some of my competitors so tirelessly point out), but I am not vapid; and it has never been my practice to serve you up some réchauffé of stale and tired plots. No, my fictions are always fresh, no two of them the least alike, and all of them uproariously funny. Observe, moreover, gentlemen, that it was I who punched Kleon in the paunch in his hour of pride; yet once I had him on the ground, I refused to kick him.

But consider my competitors; note their conduct with poor Hyperbolos. Once they had him floored, they never stopped grinding him down in the dirt—plus his mother into the bargain. It was Eupolis, of course, who led the mass-attack upon Hyperbolos; he gutted my KNIGHTS, botched it, and then dragged the resultant abortion on stage—a stunning new plagiarism entitled (of course) THE PEDERAST.

Even as larceny, a complete flop: Eupolis wanted a dirty dance,* so what did he do but introduce a drunken old hag to shake her hips? Not that she was original either; he lifted her from an ancient play by Phrynichos (who quite sensibly fed the old bitch to a sea monster).
So much for Eupolis.

After him, Hermippos opened up on Hyperbolos, and before long every imitator in town was after Hyperbolos’ hide, and every last one of them plagiarized my celebrated simile on the eels.*

I devoutly pray that those who like such stuff are bored to death by mine. But as for you men of taste who enjoy your Aristophanes and applaud his talent, why, posterity will endorse your judgment.

*Example,
whenever you launch some exceptionally crack-brained project, we promptly thunder our objection; we drizzle our displeasure. Or look to recent history. Have you forgotten that black day when a low tanner, a repulsive atheist nicknamed Paphlagon* was running for election as General? And how we responded? How we furrowed our beetling brows and rumbled with rage, and hard on the heels of the Levin rattle the steeds of Thunder?* How the moon, in dudgeon, snuffed her flame amongst the rack, and the sun in sullenness withdrew,* curling his blazing wick back beneath his globe, refusing to shine if this Kleon were elected?

So you elected—Kleon!

As native Athenians, gentlemen, you are all familiar with that local brand of statesmanship sometimes known as Blundering Through—the curious belief which holds that, by virtue of some timely divine intervention, all your most appalling political blunders will sooner or later redound to the interest of Athens.

Whence the question arises:
why not make a good thing of this latest glaring example of Blundering Through?

How?

By convicting this cormorant Kleon of bribery and peculation. Then muzzle his omnivorous maw and slap a yoke around his neck. Not only is such action in perfect accord with your long tradition of Blundering Through, but with one shrewd stroke all your bungling is redeemed as statesmanship, manifestly furthering the noblest interests of Athens.

KORYPHAIOS

Gentlemen, Critics, and Clever Fellows:

YOUR ATTENTION

PLEASE.

Because our agenda includes a few complaints and home truths, we shall be blunt.

WE ARE TIRED OF BEING IGNORED.

Of all the gods to whom this city stands in debt for benefits conferred, no god has brought more benefits than we. Yet we alone, forsaken and forgotten gods, receive no sacrifice at all.

But surely we need not remind you of all our loving care, the unsleeping devotion lavished, gentlemen, on your behalf?

The Clouds

As for the opposition, why not try their hand at the same game?

And you of Ephesos, lady, glory of the shrine of gold where the Lydian women worship,

O Artemis, come to the dance!
And you, goddess on the hill,
mistress of this lovely land
beneath your aegis guarded,
    O Athene, be with us now!

And you, dancer of Delphoi,
runner upon the peaks, at dark
when the trailing torches flicker
and the whirling Maenads cry their joy,
    O Dionysos, dance with us now!

KORYPHAIOI
Our cluster of Clouds had gathered for the outing down to Athens
when we chanced to run into the Moon, who asked us to deliver
the following message on her behalf:

GREETINGS SALUTATIONS

ETCET
TO ATHENS AND ALLIES STOP MY DEITY MORTALLY OFFENDED
BY YOUR SCANDALOUS RUDENESS DESPITE MANY SUBSTANTIAL CONTRIBUTIONS
TO WELFARE OF ATHENS STOP AM WOMAN OF ACTIONS
REPEAT ACTIONS
NOT WORDS
(Signed)
    THE MOON.

And the Moon has a point,
genlemen.
Thanks to her shining efforts on your behalf, your average savings
on lighting alone run more than a drachma a month. Why,
I can hear you now, instructing your slaves as you leave the house,
“No need to buy torches tonight, lad. The moonlight’s lovely.”
And moonlight is merely one of her many services. Nonetheless,
you brusquely refuse to devise an Accurate Lunar Calendar,
and your month is a consequent chaos,* a masterpiece of temporal
confusion.
Worse still, when the gods come hungriy trudging home at night
and find they must do without their dinner because you celebrate
your festivals on the wrong day, it’s the poor innocent Moon
who bears the brunt of their heavenly grumbling. What’s more,
on the days when you ought to sacrifice to the gods, you’re bustling
about holding trials or torturing some poor witsness on the rack.

And conversely, no sooner do the gods fast or go into mourning
for Memnon or Sarpedon, than you Athenians start carousing
and boozing.
    So be warned, gentlemen.

Very recently the gods
stripped Hyperbolos of his seat* on the Commission for Public Festivals
and Other Red-Letter Days—a measure designed to teach him
and all such Johnnies-Come-Lately a little respect for time.

While the Chorus resumes its customary position,
the doors of the Thinkery are thrown open and
Sokrates appears.

SOKRATES
Almighty Effluvium! Ozone and Chaos! Never
in all my days have I seen such peerless stupidity,
such a bungling, oblivious, brainless imbecile as this!
I no sooner teach him the merest snippets of science
than he suffers an attack of total amnesia. Still,
the Truth is my mistress and I obey.

He goes to the Thinkery door and peers into the
darkness.

where are you?
    —Strepsiades,
Fetch your mattress and come outside.

Strepsiades appears at the door, tugging at his
mattress.

STREPSIADES
I can’t come. The little bugs won’t let me leave.

SOKRATES
Down with it, blockhead. Now your attention, please.

STREPSIADES
Ready.

SOKRATES
To resume then, what particular discipline
in that vast array of choices offered by your ignorance
would you especially like to acquire? For instance,
would you prefer diction or rhythm or measures?
STREPSIADES

Measures.
Why, just the other day the flourman swindled me of half a peck.

SOKRATES
Not dry measures, dunderhead!
I want to know which meter you'd prefer to master—trimeter or tetrameter.

STREPSIADES
Well, I like the yard as well as anything.

SOKRATES
Rubbish. Palpable rubbish.

STREPSIADES
What would you like to bet that your trimeter isn't exactly three feet?

SOKRATES
Why, you illiterate numskull! However, perhaps you'd do better with rhythm.

STREPSIADES
Will rhythm buy the groceries?

SOKRATES
Sensitivity to rhythm confers a certain ineluctable social savoir-faire. Polite society will accept you if you can discriminate, say, between the marital anapest and common dactylic—sometimes vulgarly called finger-rhythm.*

STREPSIADES
Finger-rhythm?

I know that.

SOKRATES
Define it then.
STREPSIADES
Extending his middle finger in an obscene gesture.
Why, it's tapping time
with this finger. Of course, when I was a boy
Raising his phallus to the ready.*
I used to make rhythm with this one.

SOKRATES
Why, you lout!

STREPSIADES
But look, you goose, I don't want to learn this stuff.

SOKRATES
Then what do you want to learn?

STREPSIADES
Logic! Logic!
Teach me your Immoral Logic!

SOKRATES
But, my dear fellow,
one must begin by mastering the rudiments of language.
For instance, can you list me the male quadrupeds?

STREPSIADES
Pooh, I would be a damn fool if I didn't know them.
Listen: the ram, the buck, the stallion, the bull,
the duck—

SOKRATES
And now the females of the same quadrupeds.

STREPSIADES
Let's see: the ewe, the doe, the mare, the cow,
the duck—

SOKRATES
Stop right there. A gross solecism.
According to you, the word duck apparently applies
to both the male and female of the species.

STREPSIADES
Huh?
How do you mean?

SOKRATES
In your usage, they're both ducks.

STREPSIADES
Holy Poseidon, you're right! What should I have said?

SOKRATES
The male is a duck; the female's a duchess.*

STREPSIADES
A duchess?
Bravo! Almighty Ozone, that's a good one!
For that little lesson, you can bring out your basket
and I'll fill it with seed.

SOKRATES
Oops. Another solecism.
You've made basket masculine, when it's feminine.*

STREPSIADES
Basket is masculine? But why?

SOKRATES
Because the ending-et
is what in grammar we call a masculine termination.
Like the -os ending of Kleonymos.

STREPSIADES
Wait. I don't see.

SOKRATES
I repeat: basket and Kleonymos are masculine in form
and ending.

STREPSIADES
Kleonymos masculine? But he's feminine.
Form and ending. Queer as they come.
what should I call a basket?

SOKRATES
Why, a basket, of course.
By analogy with toilette.

STREPSIADES
Basket, eh?
SOKRATES
That's it.
Now you're talking Greek.

STREPSIADES
The baskette of Kleonymette?

SOKRATES
Precisely. Which brings us to the distinction between
men's names and women's names.

STREPSIADES
Oh, I know the female names.

SOKRATES
For example?

STREPSIADES
For example: Lysilla, Philinna, Demetria,
Kleitagora—

SOKRATES
And now recite some masculine names.

STREPSIADES
Easy. There's thousands of them. Like Philoxenos, Melesias,
Amynias—

SOKRATES
Stop, you nincompoop. I asked for men's names,
not women's names.

STREPSIADES
You mean those aren't men's names?

SOKRATES
Not men's names at all. A transparent confusion
between singular and plural. Suppose, for instance,
we drop the plural s from Amynias, what would we have?

STREPSIADES
Why, Amynia.*

SOKRATES
You see, by dropping the plural s,
you've made Amynias a singular woman.

STREPSIADES
Well, the draft dodger,
it serves him right. But why am I learning stuff
any damn fool knows?

SOKRATES
Fool, you flatter yourself.
However, lie down on your mattress and—

STREPSIADES
And what, Sokrates?

SOKRATES
And lucubrate upon your dilemma.

STREPSIADES
Please, no, Sokrates!
Anywhere but there. Couldn't I just go and lubricate
on the ground?

SOKRATES
Permission refused.

STREPSIADES
Ohh, what a fate!

Strepsiades burrows under the infested sheepskins
on his mattress, while Sokrates chants encouragement.

SOKRATES
First concentrate.
Then cerebrate.
Now concentrate again.

Then lucubrate.
Next, speculate
Now ruminate. And then,

if your mind gets stuck,
don't curse your luck.

Get up! Quick as a wink,
cut through the knot,
swift as a thought,
but THINK, Candidate, THINK!
Now hence, ye Syrops of Sleep! Come hither, O Pain!

STREPSIADES

Yooooooow! Yooooooow!

SOKRATES

Look here, what's biting you now?

STREPSIADES

Biting, you say?

THEY'RE MURDERING ME!

Out of the ticking

the bugs come creeping.

They're biting my ribs.

They're swilling my blood.

My balls are all sores.

My ass is a shambles.

THEY'RE MURDERING ME!

SOKRATES

There, there, old fellow. Don't take it so hard.

STREPSIADES

DON'T TAKE IT SO HARD?

When my money's gone?

When my skin's gone?

When my blood's gone?

And then what's more,

when I tried to hum

and forget these bites,

I DAMN NEAR DIED!

There is a brief interval of silence during which

Strepsiades hums and thrashes under his covers.

Then Sokrates picks up a sheepskin and peers under.

SOKRATES

Here, what's this? Have you stopped lucubrating?

STREPSIADES

Who, me?

By Poseidon, I have not!

SOKRATES

What thoughts have you had?

STREPSIADES

Only this: I've been thinking how much of me would be left

when the bugs got through.

SOKRATES

Bah! Consume you for an ass.

STREPSIADES

I am consumed.

SOKRATES

Courage, gaffer. We mustn't repine.

Pull back your covers and concentrate. What we need

is some clever quibbling subterfuge with which to frustrate

and fleece your creditors.

STREPSIADES

Who's fleecing who, Sokrates?

That's what I'd like to know.

Another brief silence follows.

SOKRATES

Hmmm. I wonder

what he's up to now? I'll just peek under the covers.

He lifts the sheepskin.

What's this? Asleep on the job, are you?

STREPSIADES

By Apollo,

I'm not sleeping!

SOKRATES

Any thoughts yet?

STREPSIADES

Not a thing.

SOKRATES

Surely you've found something.

STREPSIADES

Well, only this thing

I've got in my hand.

SOKRATES

Buffer! Get back to your pallet

and cogitate.
STREPSIADES

But, Sokrates, what am I cogitating about?

SOKRATES

A moot question, friend, whose answer lies with you. When you know what you want, kindly illuminate me.

STREPSIADES

But I've told you ten thousand times already, Sokrates. It's my debts. I want to welsh on my debts.

SOKRATES

Then back to your pallet.

Strepsiades dutifully crawls under his sheepskin.

And now distill your mind to its airiest essence, allowing the subtle elixirs of thought to permeate and penetrate every pore of the problem. Then Analyze, Refine, Synthesize, Define—

STREPSIADES

Frantically thrashing to escape the bugs.

SOKRATES

Stop fidgeting! —However, in the case of a dilemma, defer your inquiry briefly. When refreshed, return, sift your conclusions and knead vigorously. Then mull the results.

STREPSIADES

Suddenly illuminated.

SOKRATES

Ooooh, Sokrates!

STREPSIADES

EUREKA!

I've got it. A glorious dodge for ditching my debts!

SOKRATES

Aha. Expatriate.

STREPSIADES

Well, just suppose—

SOKRATES

Supposing what?

STREPSIADES

Just suppose I rented one of those witchwomen from Thessaly* and ordered her to charm down the moon from the sky. And then I snatch up the moon and I pop her into a box, and polish her face until she shines like a mirror.

SOKRATES

And what would you gain by that?

STREPSIADES

What would I gain?

Why, think what would happen if the moon never rose. I wouldn't have to pay interest.

SOKRATES

No interest? But why?

STREPSIADES

Because interest falls due on the last day of the month, before the New Moon, doesn't it?

SOKRATES

A superlative swindle! Now then, let me propose a somewhat thornier case. You are threatened, we assume, with a suit for five talents. Problem: how do you quash the verdict?

STREPSIADES

How? I don't know.

SOKRATES

By all means meditate; but beware of immuring your mind with excessive introspection. Allow your intellect instead to sally forth upon her own, as though you held a cockroach on a leash.

STREPSIADES

Suddenly illuminated.

SOKRATES

Ooh, Sokrates, I've found a glorious bamboozle! I've got it! Admit it, it's wonderful!

STREPSIADES

Suddenly illuminated.

SOKRATES

Kindly expound it first.
STREPSIADES
Well, have you ever noticed in the druggists’ shops
that beautiful stone, that transparent sort of glass
that makes things burn?

SOKRATES
A magnifying glass, you mean?

STREPSIADES
That’s it. Well, suppose I’m holding one of these,
and while the court secretary is recording my case,
I stand way off, keeping the sun behind me,
and scorch out every word of the charges.*

SOKRATES
a magnificent Bamboozle!

STREPSIADES
Whew, and am I glad
to get that suit quashed!

SOKRATES
Now then, try your teeth
on this little teaser.

STREPSIADES
Shoot.

SOKRATES
This time imagine
that you find yourself a defendant without a witness.
Your case is absolutely hopeless. Problem: to prevent
your opponent’s suit from coming to trial.

STREPSIADES
nothing to it at all.

SOKRATES
Elaborate.

STREPSIADES
But it’s a pushover,
Sokrates. While they were trying the case before mine,
I’d go hang myself.

SOKRATES
Preposterous!

STREPSIADES
It’s not preposterous.

You can’t sue a corpse.

SOKRATES
Poppycock. Palpable rubbish.

As your tutor, I hereby resign. And now, GET OUT!

STREPSIADES
You resign? But why?

* Falling on his knees in supplication.

Oh, please. I implore you, Sokrates . . .

SOKRATES
But you forget everything as fast as you learn it, numskull!
Tell me, what was the first lesson?

STREPSIADES
Well, speak up.

Let me think.

The first lesson?

The first lesson?

Ummm. That whoozit you put seeds in!

For god’s sake,

what is it called?

SOKRATES
Why, you blithering bungler!

You senile incompetent! You . . . you mooncalf! Clear out!

STREPSIADES
Sweet gods in heaven, what’s to become of me now?

I’m a goner unless I master those sleights-of-tongue.

* Falling on his knees before the Chorus.

O most gracious Clouds, please advise me. Tell me
what to do.

KORYPHAIOS
Our counsel, reverend sir, is this.

Have you a grown-up son perhaps? Then send him off
to study in your place.
STREPSIADES

It's true, ladies, I have a son,
but he's a gentleman, you see, with a true gentleman's
natural distaste for learning. So what can I do?

KORYPHAIOS

Is he the boss?

STREPSIADES

Well, he's a strapping, sturdy
boy,
and there's a bit of eagle-blood on his mother's side.
Still, I'll go fetch him anyway. If he refuses
to learn his lessons, by god, he'll never set foot
in my house again!

To Sokrates.

— I won't be gone a moment.

Exit Strepsiades into his house.

CHORUS

Now, sir, you see
what blessings we,
the Clouds, have brought to pass.

E.g. this foolish, willing tool,
this frantic, eager ass.

But seize your prey.
Avoid delay.
No matter how well hooked,
your fish is not
fried fish till caught—
and goose is better cooked.

Exit Sokrates. Enter Strepsiades, dragging
Pheidippides.

STREPSIADES

Out with you! By Condensation, you won't stay here!
Go cut your teeth on Megakles' money!

PHEIDIPPIDES

But Father,
what's the matter with you? Are you out of your head?
Almighty Zeus, you must be mad!

STREPSIADES

"Almighty Zeus!"
What musty rubbish! Imagine, a boy your age
still believing in Zeus!

PHEIDIPPIDES

What's so damn funny?

STREPSIADES

It tickles me when the heads of toddlers like you
are still stuffed with such outdated notions. Now then,
listen to me and I'll tell you a secret or two
that might make an intelligent man of you yet.
But remember: you mustn't breathe a word of this.

PHEIDIPPIDES

A word of what?

STREPSIADES

Didn't you just swear by Zeus?

PHEIDIPPIDES

I did.

STREPSIADES

Now learn what Education can do for you:
Pheidippides, there is no Zeus.

PHEIDIPPIDES

There is no Zeus?

STREPSIADES

No Zeus. Convection-Principle's in power now.
Zeus has been banished.

PHEIDIPPIDES

Drivel!

STREPSIADES

Take my word for it,
it's absolutely true.

PHEIDIPPIDES

Who says so?

STREPSIADES

Sokrates.
And Chairephon too. The famous expert on fleafeet.
PHEIDIPPIDES
Are you so far gone on the road to complete insanity you'd believe the word of those charlatans?

STREPSIADES
Hush, boy.

For shame. I won't hear you speaking disrespectfully of such eminent scientists and geniuses. And, what's more, men of such fantastic frugality and Spartan thrift, they regard baths, haircuts, and personal cleanliness generally as an utter waste of time and money—whereas you, dear boy, have taken me to the cleaner's so many times, I'm damn near washed up. Come on, for your father's sake, go and learn.

PHEIDIPPIDES
What do they teach that's worth knowing?

STREPSIADES
Worth knowing? Why, the accumulated wisdom of mankind. For instance, what a blockhead and numskull you are. Hmm.

Wait here. I'll be right back.

Strepsiades darts into his house.

PHEIDIPPIDES
Gods in heaven, what should I do? My father's gone completely balmy. Should I hale him into court on charges of insanity or notify the undertakers?

STREPSIADES
Now then, what's this called?

PHEIDIPPIDES
That? A duck.

STREPSIADES
Excellent. Now what do you call this?

PHEIDIPPIDES
Why, another duck.

STREPSIADES
Another duck? You stupid boy.

From now on you must learn to call them by their right names. This one is a duck; that one's a duchess.

PHEIDIPPIDES
A duchess!

STREPSIADES
So this is the glorious wisdom you've picked up from those walking corpses!

STREPSIADES
Oh, there's lots more too, but I'm so old everything I learn goes in one ear and right out the other.

PHEIDIPPIDES
Ah. Doubtless that explains how you lost your cloak.

STREPSIADES
I didn't lose it. I swapped it. For thoughts.

PHEIDIPPIDES
And where have your sandals gone, you idiot?

STREPSIADES
In the words of Perikles himself when they asked him where the money went: Expended as required. No comment.*

And now, inside with you, boy. Humor me in this and you can make an ass of yourself in any way you like. Ah, how well I remember those days when you were six, and I had to humor your tantrums.

Why, the very first pay I ever drew as a juror went to buy you a cart at the fair.

PHEIDIPPIDES
All right, Dad.

But someday you'll be sorry.

STREPSIADES
Ah, good dutiful boy.

STREPSIADES
Hallo there, Sokrates! Hey, Sokrates, come outside. I've brought my son along—no damn thanks to him.

---

Enter Sokrates from the Thinkery.
SOKRATES
Why, he's still a baby. How could a toddler like this
possibly operate our Hanging Baskets?

PHEIDIPPIDES
As for you,
why don't you hang yourself and skip the basket?

STREPSIADES
Here,
for shame! You'd insult the Master?

SOKRATES
IMITATING PHEIDIPPIDES.

"Thkip the bathket."

Dear me, what adorable, childish prattle. And look
at those great sulking lower lips. How in the world
could this fumbling foetus ever master the arts
of Verdict-Quashing, False Witness, Innindio,
and Character Assassination? On the other hand, however,
the case is not without precedent. Even Hyperbolos,*
after all, somehow mastered the tricks of the trade.
The fee, of course, was prodigious.

STREPSIADES
Now don't you worry,
Sokrates. The boy's a born philosopher. Yes, sir,
when he was just a mite of a shaver, so high,
he used to make the cleverest things you ever saw.
Why, there were dollhouses, sailboats, little pushhearts
from scraps of leather, and the sweetest little frogs
carved from fruit peel. He's a scholar, all right.
So tutor him in your two logics—traditional Philosophical Logic
and that flashy modern sophistic logic they call Immoral
because it's so wonderfully wicked. In any case,
if he can't master both logics, I insist that he learn
the Immoral Kind of argument.

SOKRATES
Philosophy and Sophistry*
will instruct your son in person. And now, gentlemen,
if you'll excuse me, I must leave.

STREPSIADES
But remember, Sokrates:
I want him able to make an utter mockery of the truth.

EXIT Sokrates. After his departure the doors of the
Thinkery are thrown open and Philosophy and
Sophistry are rolled forward in great gilded cages.
From the shoulders down, both are human; from the
neck up they are fighting-cocks.* Philosophy (or
the Traditional Logic) is a large, muscular
rooster, powerful but not heavy, expressing in
his movements that inward harmony and grace and
dignity which the Old Education was meant to pro-
duce; his plumage is so simple and dignified as
to seem almost dingy. Sophistry, by contrast, is
compromissarily slight, with sloping shoulders, an ema-
ciated pallor, an enormous tongue and a dis-
proportionately large phallus. His body is graceless
but extremely quick-moving; his every motion
expresses defiant belligerence, and his plumage
is brilliant to the point of flashiness. The debate
itself should be conducted at top speed with much
scratching and spurring. As the Attendants open the
cages, the fighters step out and circle each other
warily, jockeying for position.

PHILOSOPHY
Front and center, you Feathered Impertinence.
Take your little bow before the audience.
You like to swagger.

SOPHISTRY
Why, you Pompous Lump,
with all my heart. The bigger the crowd,
the better I'll rebut you.

PHILOSOPHY
You'll rebut me?
Who are you, runt?

SOPHISTRY
A Logic.

PHILOSOPHY
You,
A Logic? Why, you cheap, stunted Loquacity!
You pipsqueak Palaver!
SOPHISTRY
I may be called
Mere Sophistry, but I'll chop you down
to size. I'll refute you.

PHILOSOPHY
Refute me? How?

SOPHISTRY
With unconventionality. With ultramodernity.
With unorthodox ideas.

PHILOSOPHY
For whose present vogue
we are indebted to this audience of imbeciles
and asses.

SOPHISTRY
Asses? These sophisticated gentlemen?
These wits?

PHILOSOPHY
I'll invalidate you.

SOPHISTRY
Invalidete me?

PHILOSOPHY
How, fossil?

SOPHISTRY
My arguments are Truth and Justice.

PHILOSOPHY
Then I'll disarm you and defeat you, friend.
Your Justice doesn't exist.

PHILOSOPHY
What? No Justice?

Preposterous!

SOPHISTRY
Then show it to me. Where is it?

PHILOSOPHY

SOPHISTRY
In the Lap of the Gods? Then would you explain
how Zeus escaped punishment after he imprisoned
his father?* The inconsistency is glaring.
PHILOSOPHY
Aaaaagh.
What nauseating twaddle. It turns my stomach.

SOPHISTRY
Why, you Decrepitude! You Doddering Dotard!

PHILOSOPHY
Why,
you Precocious Pederast! You Palpable Pervert!

SOPHISTRY
Pelt me with roses!

PHILOSOPHY
You Toadstool! O Cesspool!

SOPHISTRY
Wreath my hair with lilies!

PHILOSOPHY
Why, you Parricide!

SOPHISTRY
Shower me with gold! Look, don't you see
I welcome your abuse?

PHILOSOPHY
Welcome it, monster?
In my day we would have cringed with shame.

SOPHISTRY
Whereas now we're flattered. Times change.
The vices of your age are stylish today.

PHILOSOPHY
Repulsive Whippersnapper!

SOPHISTRY
Disgusting Fogy!

PHILOSOPHY
Because of you the schools of Athens
stand deserted; one whole generation
chaffers in the streets, gaping and idle.
Mark my words: someday this city
shall learn what you have made her men:
effeminate and fools.

SOPHISTRY
Ugh, you're squalid!

PHILOSOPHY
Whereas you've become a Dandy and a Fop!
But I remember your beggared beginnings,
playing as Telephos,* grubby and shifty,
tricked out in Euripidean rags and tatters
and cramming your wallet with moldy leavings
from Pandaleos' loaf.*

SOPHISTRY
What a prodigy of wisdom
was there!

PHILOSOPHY
And what a prodigy of madness here—
your madness, and madder still than you,
this maddened city which lets you live—
you, corrupter and destroyer of her youth!

SOPHISTRY
Throwing a wing about Pheidippides.
Why, you Hoary Fossil! This is one student
you'll never teach!

PHILOSOPHY
Pulling Pheidippides back.
Teach him I shall—
unless he's prepared to devote his career
exclusively to drivel.

SOPHISTRY
Bah, rave to yourself.
—Come here, boy.

PHILOSOPHY
You touch him at your peril.

KORYPHAIOS
Intervening.
Gentlemen, forego your wrangling and abuse,
and each present his arguments in turn.
Describe how you taught the men of the past,
and you, Sir, your New Education.
PHILOSOPHY

your proposal.

SOPHISTRY

As do I.

KORYPHAIOS

Excellent.

Who will speak first?

SOPHISTRY

Let him begin.

I yield the floor. But when he's done,
I'll smother him beneath so huge
a driving hail of Modern Thought
and Latest Views, he cannot speak—
or if he does, my hornet words
and waspish wit will sting him so,
he'll never speak again.

CHORUS

—At last!

—The Great Debate begins!

—Between these two

contending, clever speakers,

—matched so fairly,

—who will win, is anybody's guess.

—Both are subtle,

—both facile, both witty,

—both masters of rebuttal

—and abuse.

—The stake? Wisdom.

—Wisdom is the prize.

—For her they fight.

—So listen well.

—Upon their skill, the destinies of

Language, Intellect, and Educated Athens hang.

KORYPHAIOS

To Philosophy.

Come, Sir, I summon you—you who conferred your crown of virtue
upon the Older Generation—to take the stand. Be bold; rise
and with clarion tongue tell us what you represent.

PHILOSOPHY

Gentlemen,

I propose to speak of the Old Education,* as it flourished once
beneath my tutelage, when Homespun Honesty, Plain-speaking, and
Truth
were still honored and practiced, and throughout the schools of Athens
the regime of the three D's—DISCIPLINE, DECORUM, and
DUTY—

enjoyed unchallenged supremacy.

Our curriculum was Music and

enforced by that rigorous discipline summed up in the old adage:

BOYS SHOULD BE SEEN BUT NOT HEARD. This was our
cardinal rule,

and when the students, mustered by groups according to region,

were marched in squads to school, discipline and absolute silence
prevailed.

Ah, they were hardy, manly youngsters. Why,
even on winter mornings when the snow, like powdered chaff,
came siftting down, their only protection against the bitter weather
was a thin and scanty tunic. In the classes, posture was stressed
and the decencies firmly enforced: the students stood in rows,
rigidly at attention, while the master rehearsed them by rote,
over and over. The music itself was traditional and standard—
such familiar anthems and hymns as those, for instance, beginning
A Voice from Afar or Hail, O Pallas, Destroyer!*—and the old modes
were strictly preserved in all their austere and simple beauty.

Clowning in class was sternly forbidden, and those who improvised
or indulged in those fantastic flourishes and trills so much in vogue
with the degenerate, effeminate school of Phrynis, were promptly

thrashed

for subverting the Muses.

In the gymnasium too decorum was de-

manded.

The boys were seated together, stripped to the skin, on the bare ground,
keeping their legs thrust forward, shyly screening their nakedness
from the gaze of the curious. Why, so modest were students then,

that when they rose, they carefully smoothed out the ground beneath

them,

lest even a pair of naked buttocks leaving its trace in the sand
should draw the eyes of desire. Anointing with oil was forbidden
below the line of the navel, and consequently their genitals kept
their boyish bloom intact and the quначlike freshness of youth.

Toward their lovers their conduct was manly*; you didn't see them
mincing or strutting, or prostituting themselves with girlish voices or coy, provocative glances.

At table courtesy and good manners were compulsory. Not a boy of that generation would have dreamed of taking so much as a radish or the merest pinch of parsley before his elders had been served. Rich foods were prohibited, raucous laughter or crossing their legs forbidden. . . .

**Sophistry**

what musty, antiquated rubbish. It reeks of golden grasshoppers, all gewgaws and decaying institutions!

**Philosophy**

Nonetheless, these were the precepts on which I bred a generation of heroes, the men who fought at Marathon.

*To Sophistry*

And what do you teach?

Modesty?

No, vanity and softness,

and the naked beauty of the body muffled in swirling clothes, gross and unmanly. Why, at Panathenaia now it sickens me to see the boys dancing, ashamed of their own bodies, effetely forgetting their duty to the goddess while they screen their nakedness behind their shields.

Bah.

*To Pheidippides.*

No, young man, by your courage I challenge you. Turn your back upon his blandishments of vice, the rotten law courts and the cheap, corrupting softness of the baths. Choose instead the Old, the Philosophical Education. Follow me and from my lips acquire the virtues of a man:

- A sense of shame, that decency and innocence of mind that shrinks from doing wrong.
- To feel the true man's blaze of anger when his honor is provoked.
- Deferece toward one's elders; respect for one's father and mother.
- To preserve intact, unsullied by disgrace or stained with wrong, that image of Manliness and Modesty by which alone you live.
- Purity:—to avoid the brothels and the low, salacious leer of prostituted love—which, being bought, corrupts your manhood and destroys your name. Toward your father scrupulous obedience; to honor his declining years who spent his prime in rearing you. Not to call him Dotard or Fogy—

**Sophistry**

Boy, if you follow his advice, you'll finish by looking like one of Hippokrates' sissified sons. They'll call you Mollycoddle Milksop.

**Philosophy**

Rubbish. I promise you, not contentious disputation and the cheap, court-room cant of this flabby, subpoena-serving, shyster-jargoned de-generation, but true athletic prowess, the vigor of contending manhood in prime perfection of physique, muscular and hard, glowing with health.

Ah, I can see you now, as through an idyl moving—you with some companion of your age, modest and manly like you, strolling by Akademe perhaps, or there among the olives, sprinting side by side together, crowned with white reed, breathing with every breath the ecstasy of Spring returning, the sudden fragrance of the season's leisure, the smell of woodbine and the catkins flung by the poplar, while touching overhead, the leaves of the linden and plane rustle, in love, together.

So follow me, young man, and win perfection of physique. To wit—

Demonstrating each attribute individually.

**BUILD**

Stupendous.

**COMPLEXION**

Splendid.

**SHOULDERS**

Gigantic.

**TONGUE**

Petite.

**BUTTOCKS**

Brawny.

**PECKER**

Discreet.

But follow my opponent here, and your reward shall be, as follows:

**BUILD**

Effeminate.

**COMPLEXION**

Ghastly.

**SHOULDERS**

Hunched.

**TONGUE**

Enormous.

**BUTTOCKS**

Flabby.

**PECKER**

Preposterous!

(but thereby insuring you an enormous and devoted political following.)

What is worse, you shall learn to make a mockery of all morality, systematically confounding good with evil and evil with good, so plumped and pursy with villainy, sodomy, disgrace, and perversion, you resemble ANTIMACHOS himself.

Depravity can sink no lower.
CHORUS
—Bravo!
—What brilliance!
—What finesse!
—This is wisdom
at its noble best!
—Such Modesty,
—such Decorum
in every lovely word distilled!
—Ah, lucky they
—whose happy lives were lived
—beneath your dispensation,
—by all the ancient virtues blessed!

To Sophistry.
—So, sir,
—despite your vaunted subtlety and wit,
—Your rival’s speech has scored.
—Some master stroke,
—is needed now.
—The stage is yours.

KORYPHAIOS
Unless your strategy is shrewdly planned and your attack ferocious,
then your cause is lost. We’ll laugh you out of court.

SOPHISTRY
At last!
A few minutes more and I would have exploded from sheer impatience
to refute him and demolish his case.

Now then, I freely admit
that among men of learning I am—somewhat pejoratively—dubbed
the Sophistic, or Immoral, Logic. And why? Because I first
devised a Method for the Subversion of Established Social Beliefs
and the Undermining of Morality. Moreover, this little invention of
mine,
this knack of taking what might appear to be the worse argument
and nonetheless winning my case, has, I might add, proved to be
an extremely lucrative source of income.

But observe, gentlemen,
how I refute his vaunted Education.

To Philosophy
Now then, in your curriculum
hot baths are sternly prohibited. But what grounds can you possibly
adduce
for this condemnation of hot baths?

PHILOSOPHY
What grounds can I adduce? Why,
they’re thoroughly vicious. They make a man flabby and effeminate.

SOPHISTRY
You can stop right there, friend. I have you completely at my mercy.
Answer me this: which of the sons of Zeus was the most heroic?
Who suffered most? Performed the greatest labors?

PHILOSOPHY
In my opinion,
the greatest hero who ever lived was Herakles.

SOPHISTRY
Very well then.
But when we speak of the famous Baths of Herakles,* are we speaking
of hot baths or cold baths? Necessarily, sir, of hot baths.
Whence it clearly follows, by your own logic, that Herakles was
both flabby and effeminate.

Q.E.D.

PHILOSOPHY
Q.E.D.! This is the rubbish I mean!
This is the logical claptrap so much in fashion with the young!
This is what fills the baths and empties the gymnasiums!

SOPHISTRY
Very well,
if you like, consider our national passion for politics and debating,
pastimes which you condemn and I approve. But surely, friend,
if politics were quite so vicious as you pretend, old Homer—*
our mentor on moral questions—would never have portrayed Nestor
and those other wise old men as politicians, would he? Surely
he would not.

Or take the question of education in oratory—
in my opinion desirable, in yours the reverse. As for Moderation and
Decorum,
the very notions are absurd. In fact, two more preposterous
or pernicious prejudices, I find it hard to imagine. For example,
can you cite me one instance of that profit which a man enjoys by exercising moderation? Refute me if you can.

PHILOSOPHY

Why, instances abound
Er . . . Peleus,* for example. His virtue won him a sword.

SOPHISTRY

A sword, you say? What a charming little profit for the poor sucker! Look at our Hyperbolos: nothing virtuous about him, god knows, and yet, what with peddling lamps—plus a knack for swindling—he piled up a huge profit. All cold cash. No swords for him. No sir, Hyperbolos and swords just don’t mix.*

PHILOSOPHY

Furthermore, Peleus’ chastity earned him the goddess Thetis for his wife.

SOPHISTRY

Precisely, and what did she do? Promptly ditched him for being cold, no passion for that all-night scrimmage between the sheets that lusty women love.

Bah, you’re obsolete.

To Pheidippides.

—Young man,

I advise you to ponder this life of Virtue with scrupulous care, all that it implies, and all the pleasures of which its daily practice must inevitably deprive you. Specifically, I might mention these: Sex, Gambling, Gluttony, Guzzling, Carousing, Etc.

And what on earth’s the point of living, if you leach your life of all its little joys?

Very well then, consider your natural needs.

Suppose, as a scholar of Virtue, you commit some minor peccadillo, a little adultery, say, or seduction, and suddenly find yourself caught in the act. What happens? You’re ruined, you can’t defend yourself (since, of course, you haven’t been taught). But follow me, my boy, and obey your nature to the full; romp, play, and laugh without a scruple in the world. Then if caught in flagrante, you simply inform the poor cuckold that you’re utterly innocent and refer him to Zeus as your moral sanction. After all, didn’t he, a great and powerful god, succumb to the love of women?

Then how in the world can you, a man, an ordinary mortal, be expected to surpass the greatest of gods in moral self-control? Clearly, you can’t be.

PHILOSOPHY

And suppose your pupil, by taking your advice, is promptly convicted of adultery and sentenced to be publicly reamed up the rectum with a radish?* How, Sir, would you save him from that?

SOPHISTRY

Why, what’s the disgrace in being reamed with a radish?

PHILOSOPHY

Sir, I can conceive of nothing fouler than being buggered by a radish.

SOPHISTRY

And what would you have to say, my friend, if I defeat you on this point too?

PHILOSOPHY

What could I say?

I could never speak again for shame.

SOPHISTRY

Very well then.

What sort of men are our lawyers?

PHILOSOPHY

Why, they’re all Buggers.

SOPHISTRY

Right!

What are our tragic poets then?

PHILOSOPHY

Why, they’re Buggers too.

SOPHISTRY

Right!

And what of our politicians, Sir?

PHILOSOPHY

Why, Buggers to a man.
SOPHISTRY
You see how stupidly you spoke?
And now look at our audience.
What about them?

PHILOSOPHY
I'm looking hard.

SOPHISTRY
And what do you see?

PHILOSOPHY
By heaven,
I see an enormous crowd of people,
and almost all of them Buggers.

Pointing to individuals in the audience.
See there? That man's a Buggers,
and that long-haired fop's a Buggers too.

SOPHISTRY
Then how do we stand, my friend?

PHILOSOPHY
I've been beaten by the Buggers.

Flinging his cloak to the audience.
O Buggers, catch my cloak
and welcome me among the Buggers!

With a wild shriek Philosophy disappears into
his cage and is wheeled away into the Thinkery, just
as Sokrates comes out.

SOKRATES
Well, what are your wishes? Will you take your son home,
or shall I instruct him in the Pettifogger's Art?

STREPSIADES
and flog him too. But remember: I want his tongue
honied down like a razor. Sharpen him on the left side
for piddling private suits, but grind him on the right
for Grand Occasions and Affairs of State.

SOKRATES
Sir,
you may depend upon me. I promise I'll send him home
a consummate little sophist.

PHEIDIPPIDES
God, what a picture of misery—
a nasty, pasty-faced, consummate little stinker!

Exeunt Sokrates and Phedippides into the Thinkery.

KORYPHAEOS
Very well, go in.

To Strepsiades.
—You, Sir, shall live to regret your decision.

Exit Strepsiades into his own house, as the
Chorus turns sharply and faces the audience.

CHORUS
And now, Gentlemen of the Jury, a few brief words about the Prize
and the solid benefits you stand to gain by voting for THE CLOUDS—
as you certainly should anyway.

First of all, when the season sets
for Spring and plowing time has come, we guarantee each judge's fields
the top priority in rain. Let others wait. Furthermore,
for his vineyards and orchards, we promise, perfect growing-weather:
no drought shall touch them, no flooding rains destroy.

However,
if some presuming mortal dares dishonor our divinity,
let him savor his punishment:

His acres, hard, dry, and barren,
shall see no harvesting. No wine, no fruit, shall ripen for him.
And when the olives sprout, and the season's green festoons
the vines, his shall wither, battered by our ratatat of rain.
And when he's busy baking bricks, we'll snuff his kiln with water
and smash his tiles with cannonades of hail. If he, his friend,
or relatives should celebrate a wedding, we'll send a DELUGE down
and drown the wedding night in rain!

By god, we'll make him say
he'd rather be roasting in Egypt than have voted wrong today!

Enter Strepsiades from his house, counting on
his fingers.

STREPSIADES
Five days, four days, three days, two days, and then

that one day of all the days of the month
I dread the most, that makes me fart with fear—
the last day of the month, Due date for debts,*
when every dun in town has solemnly sworn
to drag me into court and bankrupt me completely.
And when I plead with them to be more reasonable—
"But PLEASE, sir. Don't demand the whole sum now.
Take something on account. I'll pay you later."—
they snort they'll never see the day, curse me
for a filthy swindler and say they'll sue.

Well,
let them. If Pheidippides has learned to talk,
I don't give a damn for them and their suits.

Now then,
a little knock on the door and we'll have the answer.

_He knocks on Sokrates' door and calls out._

Porter!

Hey, porter!

**Sokrates opens the door.**

_Ah, Strepsiades. Salutations._

**Strepsiades**

_Same to you, Sokrates._

_He hands Sokrates a bag of flour._

_Here. A token of my esteem._

_Call it an honorarium.* Professors always get honorariaums._

**Snatching back the bag.**

_But wait: has Pheidippides learned his rhetoric yet—
that swindling Rhetoric that performed for us just now?*

**Sokrates**

_Taking the bag._

_He has mastered it._

**Strepsiades**

_O great goddess Bamboozle!*

**Sokrates**

_Now, sir, you can evade any legal action you wish to._

**Strepsiades**

_Really? Even if I borrowed the money before witnesses?*

**Sokrates**

_Before ten thousand of them. The more the merrier._

**Strepsiades**

_In parody._

_Then let my loud falsetto peal_
_with gladsome paeans plangent!*_

_Mourn, O ye lenders of money,
weep, O principals! Gnash your teeth,
O ye interests compounded._

_For lo, within mine halls_
_a son hath risen,_
_a son with burnish'd tongue,_
_yea, with double edges lambent!_

_Hail, O hero of my halls,_
_who delivered my domicile,_
_who fractur'd mine enemies_ _and drowned a father's dolor!_

_Ho, fetch forth mine son forthwith! O my son,_
_debouch from mine abode!*_

_O heed thy father, priethee!_

_Pheidippides, the very image of "modern youth,"_ _slouches contemptuously out of the Thinkery._

**Sokrates**

_Behold the man!*

**Strepsiades**

_O joy! My boy!*

**Sokrates**

_Take him and go._

**Strepsiades**

_O my son! O! O!_ 
_O! O! O! O!_ 
_Oh, how gladly I behold thy pasty face,_ 
_that negative and disputatious look! And see there,_ 
_how there blossoms on his lips our national rejoinder,_ 
_"Huh? G'wan!" How perfectly he is the rogue,_ 
_but looks the victim through and through. And on his face_ 
_that utter pallor, ah, that true Athenian look!_ 
—all right, Son, you ruined me, so it's up to you_ 
to save me._
PHEIDIPPIDES

What's eating you, Dad?

STEPSIADES

Your damn debts.
And the date. That's what. Your debts are due today.
Today's Dueday.*

PHEIDIPPIDES

Today's two days? Or two Duedays?
But how can one day be two days?

STEPSIADES

How should I know?
It just is!
Resuming more calmly, patiently explaining.

Today's Dueday, son. This is the day
when creditor's are required by law to post their bond*
in court in order to obtain a summons against their debtors.
No bond, no summons.

PHEIDIPPIDES

Ergo, they will forfeit their bond.
By definition, one day cannot be two days.

STEPSIADES

But why not?

PHEIDIPPIDES

Because it's a logical impossibility, numskull.
If one day were two days, then ipso facto a woman
could be simultaneously a young girl and an old hag.
Which she can't be.

STEPSIADES

But it's the law!

PHEIDIPPIDES

In that case,
I suspect the law on debt has been profoundly misinterpreted.

STEPSIADES

Misinterpreted? But how?

PHEIDIPPIDES

Enigmatically.

Old Solon loved the people.

STEPSIADES

And what in god's name has that got to do with the Duedate?

PHEIDIPPIDES

Solon's sympathies lay with the debtor, not with the creditor.

STEPSIADES

And so?

PHEIDIPPIDES

And so, when Solon promulgated his law on debt,
he carefully specified two distinct Duedates
for debts, not one, as the current interpretation has it.
Prima facie, a summons could be issued on either day,
though in practice this was impossible, since the creditor's bond
could be paid only on the second Duedate.

STEPSIADES

But why did Solon
set two Duedates?

PHEIDIPPIDES

Read between the lines, moron.
Solon intended that the debtor should present himself in court
on the first date and declare himself absolved of his debts
on the grounds of the creditor's failure to issue a summons.
He won by default. If, however, the debtor failed
to take advantage of the deliberate ambiguity of the law,
he had to account to his creditors in court the next day.
Not an attractive prospect.

STEPSIADES

But wait. If that's the law,
then how do you account for the glaring fact that the magistrates
actually demand that the creditor's bond be paid on the first day
and not on the second?

PHEIDIPPIDES

Precisely because they are magistrates.*
Ipso facto, their greed is magisterial and their gluttony
uncontrollable. And because they can't wait to get their fingers
in the pie, they have quietly connived among themselves
to set the Due date back a day earlier. Their procedure, of course, is utterly illegal.

**STREPSIADES**

_Still perplexed._

*Huh?*

_But suddenly illuminated._

*Hey!*

**Turning to the audience.**

Well, numskulls, what are you gawking at?
Yes, you down there!
You dumb sheep with the pigeon faces!
Cat's-paws for cleverer men! Any sophist's suckers!
O shysterbait!
Generation of dupes!
Poor twerps, poor silly saps!

—And now, gentlemen, a song.

_Audience of Asses,_
you were born to be taken!

A little ditty of my own, dedicated to me and my son, offering us warmest congratulations on our success.

_everybody?*

_Singing and dancing._

_Oh, Strepsiades, Strepsiades,
there's no one like Strepsiades!
He went to school with Sokrates
who taught him all his sophistries!
He's smarter than
Euripides,
for only he's,
yes, only he's
Pheidippides
Old Man!

By god, if ever I heard a hit, that's it!

_To Pheidippides._

Once you finish off my creditors' suits, the whole town will go green with envy of Strepsiades.

And now, son,
I'm throwing a dinner in your honor. So let's go in.

_Exeunt Strepsiades and Pheidippides into the house._

_An instant later Pasias arrives, accompanied by his Witness, with a summons against Strepsiades. A notorious spendthrift, drunkard, and glutton, Pasias is grotesquely fat. Essentially a good-natured man, he has prepared himself for a difficult ordeal, and comes equipped with a wine flask from which he periodically fortifies himself._

**PASIAS**

Well, what am I supposed to do? Throw my hard-earned money down the drain?

_Something in his own words reminds him that he needs a drink, a stiff one._

Playboy Pasias, is it?

_Nossiree._

_Bah! Me and my great big heart! Soft-touch Pasias._

But I should have known. You've got to be a bastard.

_Hard as nails._

_He hardens himself with a drink._

If I'd sent him packing when he tried to put the touch on me, I wouldn't be in this fix now.

_What a mess._

_To Witness._

I have to drag you around to stand witness, and what's more, I'll make an enemy of Strepsiades for life.

_He fortifies himself with still another drink._

Well, I'll sue him anyway.

_Yessiree._

_Athens expects it,_

and I won't have it said that Pasias ever besmirched the National Honor.*

_Nossiree._

_Shouting into the house._

—Strepsiades! I'm suing you!

**STREPSIADES**

_Appearing at the door._

_Somebody want me?*

**PASIAS**

I do. Today's the Dueday.
Strepsiades

To the audience.

Gentlemen, you're all witnesses: he distinctly mentioned
two days.

To Pasias.

—What are you suing me for?

Pasias

What for? Why, the money you borrowed from me to buy that horse.

Strepsiades

Horse?

What horse? Everybody knows I'm allergic to horses.
Ask the audience.

Pasias

By god, you swore you'd pay me!
You swore it by the gods.

Strepsiades

Well, by god, now I swear
I won't. Anyway, that was before Pheidippides learned the Science
of Unanswerable Argument.

Pasias

And that's why you won't pay me?

Strepsiades

Can you think of a better reason? I'm entitled to some return
on his education, aren't I?

Pasias

And you're prepared to perjure yourself
on an oath sworn by the gods?

Strepsiades

By the gods?

Pasias

What gods?

Why, Zeus, Poseidon, and Hermes.

Strepsiades

Damn right

I would. And what's more, I'd do it again. Gratis,
by god!
I like perjury.

Pasias

Why, you barefaced swindler!
You damnable liar!

Strepsiades

Prodding Pasias in the belly.

Boy, what blubber!

—You know,
that paunch of yours ought to make someone a mighty dandy
wineskin . . .

Pasias

By god, that's the last straw!

Strepsiades

Hmmm. Yup,
five gallons, I'd guess offhand.

Pasias

So help me Zeus!
So help me every god in heaven, you won't get away
with this!

Strepsiades

You know, you and your silly gods tickle me.
Zeus is a joke to us Thinking Men.

Pasias

By god, someday
you'll regret this.

Now then, for the last time,
will you pay me or won't you? Give me a straight answer
and I'll be off.

Strepsiades

Don't you budge. I'll be right back
and bring you my final answer.

Strepsiades rushes into the house.
PASIAS
To his Witness.

Do you think he'll pay me?

STREPSIADES
Reappearing from the house; in his hands he holds a large basket.

Now where's that creditor of mine?

Holding up the basket in front of Pasias.
—All right, you, what's this?

PASIAS
That? A basket.

STREPSIADES
A basket?
And a stupid ignoramus like you has the nerve to come around badgering me for money? By god, I wouldn't give a cent to a man who can't even tell a basket from a baskette.

PASIAS
Then you won't pay me back?

STREPSIADES
Not if I know it.

Pasias
you Colossus of Lard, why don't you quietly melt away? Beat it, Fatboy!

He threatens to beat him with his baskette.

PASIAS
I'm going. Yessiree. And by god, if I don't post my bond with the magistrates right now, my name's not Pasias.

Nossiree.

STREPSIADES
Tch tch. Poor Pasias.

You'll just lose your bond on top of all your other losses. And, personally speaking, I wouldn't want to see you suffer just because your grammar's bad.

Beating Pasias over the head with his baskette.

Remember?
Baskette!

Exit Pasias at a run pursued by Strepsiades. An instant later, hideous wails and shrieks are heard off-stage, and these are followed by the pathetic entrance of the notorious effeminate and gambler, Amarynas. He has just had an accident with his chariot, and his entrance is a picture of misery: his head is covered with blood, his clothes torn, and his language, a delirious compound of tragic rhetoric and a marked lisp, is almost unintelligible.

AMYNIAS
Alackaday!

Woe is me!

Alas! Alas!

STREPSIADES
Gods in heaven,

what a caterwauling!

—Look, who are you?

The way you whine you sound like some poor blubbering god from a tragedy by Karkinon.*

AMYNIAS
Wouldst hear how I am hight? Know then: a wretched wight in woe am I, Adversity yclept.

STREPSIADES
Then hit the road, Buster.

AMYNIAS
O Funest Doom!

O Darkling Destiny!

How fell the fate by which I fall,

ah, Pallas!

O all unhors'd! O human haplessness

I am!

STREPSIADES
I get it. You're an actor, and you want me to guess what part you're practicing.

Hm.

Must be a female role.

But of course!

You're Alkmene in the play by Xenokles, and you're mourning your brother...
AMYNIAS

You're such a tease,
you naughty man.

Now then, be a dear, and ask Pheidippides
to pay me my money. You see, I'm in the most frightful way.
You simply can't imagine!

STREPSIADES

Money? What money?

AMYNIAS

Pheidippides borrowed.

STREPSIADES

Hmm. You are in a frightful way.
You simply can't imagine.

AMYNIAS

But I can. You see, on my way,
I was thrown from my chariot. Literally hurled into the air.
It was too awful.

STREPSIADES

It fits. You must have hurt your head.
That would explain that gibberish about money.

AMYNIAS

What's gibberish
about wanting my money?

STREPSIADES

Obvious case of delirium.

Brain damage too, I suspect.

AMYNIAS

Brain damage?

STREPSIADES

Yup.

You'll probably be queer the rest of your life. That's how
I see it.

AMYNIAS

Pay me my money, or I'll sue you! That's how
I see it.
STREPSIADES

Is that so?

All right, let me ask you a question.
I'm curious to know which theory on rainfall you prefer.
Now then, in your considered opinion, is the phenomenon of rain
best explained as a precipitation of totally fresh water,
or is it merely a case of the same old rainwater
in continuous re-use, slowly condensed by the Clouds
and then precipitated once more as rain?

AMYNIAS

My dear fellow,
I really couldn't care less.

STREPSIADES

Couldn't care less, eh?
And a sophomor like you, completely ignorant of Science,
thinks he's got the right to go around pestering people
to pay him money?
Boy, some nerve!

AMYNIAS

Look here,
if you're temporarily short of cash, then let me have
the interest.

STREPSIADES

Interest? What the devil's interest?

AMYNIAS

Why, interest
is nothing more than the tendency of a cash principal
to reproduce itself by increments over a period of time.
Very gradually, day after day, month after month,
the interest accrues and the principal grows.

STREPSIADES

Dandy.
Then in your opinion there's more water in the ocean now
than last year? Is that right?

AMYNIAS

But, of course, it isn't.
Oceans can't grow, you silly man. It's against the Law
of Nature.

STREPSIADES

Then what about you, you unnatural bastard?
If the ocean, with all those rivers pouring into it,
doesn't grow, then who the hell are you to expect your money
to grow?
And now CLEAR OUT! Go peddle your subpoenas
somewhere else.

AMYNIAS stands firm and Strepsias calls out
to his slave.

—Bring me my horsewhip.

The slave brings the whip and Strepsias cracks
it threateningly at Amynius.

AMYNIAS

Appealing in terror to the audience.

you're my witnesses!

STREPSIADES

Still here, are you?

He flicks Amynius with the whip.
Galloping, you gelding!

He flicks Amynius again with his whip, this time
in the rear.

AMYNIAS

A palpable hit!

STREPSIADES

Raising his phallus to the ready.

—Git, dammit, or I'll sunder your rump
with my ram!

With a wild whinny of fright, Amynius
rushes offstage.

Going, are you?
A damned good thing.
And don't come back here nagging me about your money,
or I'll badger your bum!
You'll get the ride of your life!

Strepsias re-enters the house to resume his inter-
rupted dinner with Pheidippides.
CHORUS

Individually

—Such is wickedness,
   —such its fatal fascination:
   —this senile amateur of fraud,
   —by greed
   and guile obsessed,
   —frantic to disown his debts
   —(and,
   —such his luck,
   —apparently
   —succeeding).
   —BUT please take note:
   —soon,
   —perhaps today,
   —this poor man's Sokrates must learn his lesson,
   —viz.
   —CRIME DOES NOT PAY.
   —Dishonesty comes home to roost.
   —It's Poetic Retribution!
   —But now, poor fish!
   —he thinks he's sitting —pretty.
   —Success at last!
   —For hasn't his Pheidippides become
   —so voluble a speaker,
   —so specious
   a sophist,
   —a shyster so vicious,
   —that he's now
   —ABSOLUTELY INVINCIBLE?
   —So he gloats.
   —But wait!
   —Take note:
   —the time will come—

Strepsiades howls in pain offstage.

—in fact, it's coming now—

—when poor Strepsiades will wish to god
   —Pheidippides were
   —DUMB!

With a bellow of pain and terror, Strepsiades plunges out of his house, hotly pursued by Pheidippides with a murderous stick.

STREPSIADES

OOOUUUUCH!!!

HALP!

For god's sake, help me!

Appealing to the Audience.

—Friends!
   Fellow-countrymen! Aunts! Uncles! Fathers! Brothers!
   To the rescue!
   He's beating me!
   Help me!
   Ouch!

O my poor head!

Ooh, my jaw!

To Pheidippides.

—You great big bully, Hit your own father, would you?

PHEIDIPPIDES

Gladly, Daddy.

STREPSIADES

You hear that? The big brute admits it.

PHEIDIPPIDES

I proclaim it.

Admit it? Hell,

STREPSIADES

You cheap Cutthroat!

You father-beating Bastard!

You Turd!

You . . . you . . . you—

PHEIDIPPIDES

you're complimenting me?

Carry on. Don't you know
STREPSIADES

Why, you ... you ... you Palpable Pervert!
You Pederast!

PHEIDIPPIDES

Roll me in roses, Daddy!

STREPSIADES

You Bugger!

Hit your own father, would you?

PHEIDIPPIDES

Damn right I would.
God knows, I had good justification.

STREPSIADES

Justification, you say?
Why, you Dunghill, what justification could there ever be for hitting your own father?

PHEIDIPPIDES

Would a logical demonstration convince you?

STREPSIADES

A logical demonstration? You mean to tell me you can prove a shocking thing like that?

PHEIDIPPIDES

Elementary, really.
What's more, you can choose the logic. Take your pick. Either one.

STREPSIADES

Either which?

PHEIDIPPIDES

Either which? Why, Sokratic logic or pre-Sokratic logic. Either logic. Take your pick.

STREPSIADES

Take my pick, damn you? Look, who do you think paid for your shyster education anyway? And now you propose to convince me that there's nothing wrong in whipping your own father?
PHEIDIPPIDES

I not only propose it; I propose to prove it. Irrefutably, in fact. Rebuttal is utterly inconceivable.

STREPSIADES

By god, this I want to hear!

CHORUS

Old friend, WATCH OUT. Upon this bout may hang your own survival.

What's more, unless I miss my guess, the odds are on your rival.

That curling lip, that sneer's a tip, and you'd be wise to heed it.

KORYPHAIOS

To Strepsiades,

And now, Sir, I suggest you brief the Chorus. Begin at the beginning and describe your little fracas exactly as it happened.

STREPSIADES

Yes'm.

The whole damn dirty squabble from start to finish. As you know, we both went in to celebrate. Well, Ladies, a custom's a custom,* after all, and there's nothing like a little music, I always say, to get a party off to a good start. So naturally I asked him to get down his lyre and sing a song. For instance, Simonides' Shearin' o' the Ram.* Well, you know what the little stinker answered? That singing at table was—Obsolete, Old Hat, Lowbrow, Bullshit! Strictly for grandmothers.

PHEIDIPPIDES

You damn well got what you deserved. Asking me to sing on an empty stomach! What is this anyway? A banquet or a cricket-concert?

STREPSIADES

You hear that? A cricket-concert!

His exact words. And then he started sneering at Simonides! Called him—get this—Puny Pipsqueak Hack! Was I sore? Brother!

Well, somehow I counted to ten, and then I asked him to sing me some Aischylos.

Please. And you know what he replied? That he considered Aischylos "a poet of colossal stature:"—Yup, "the most colossal, pretentious, pompous, spouting, bombastic bore in poetic history."* I was so damn mad I just about went through the roof. But I gritted my teeth together, mustered up a sick smile and somehow managed to say, "All right, son, if that's how you feel, then sing me a passage from one of those highbrow modern plays you're so crazy about."

So he recited—you can guess—Euripides! One of those slimy tragedies* where, so help me, there's a brother who screws his own sister!

Well, Ladies, that did it! I jumped up, blind with rage, started cursing at him and calling him names, and he started screaming and cursing back and before I knew it, he hauled off and—wham!—he biffed me and bashed me and clipped me and poked me and choked me and—

PHEIDIPPIDES

And, by god, you had it coming! Knocking a genius like Euripides!
STREPSIADES

Euripides!
A GENIUS??

That . . .

Pheidippides raises his stick threateningly.
HALP! He’s hitting me!

PHEIDIPPIDES

You’ve got it coming, Dad!

STREPSIADES

Got it coming, do I?
Why, you ungrateful brat, I raised you!
When you were a baby I pampered you! I waited on you hand and foot!
I understood your babtalk. You babbled GOO and I obeyed. Why,
when you whimpered WAWA DADA, who brought your water?
DADA did.
When you burbled BABA, who brought your Baby Biscuits?
DADA did.
And when you cried GOTA GO KAKA DADA, who saved his shitty darling?
Who rushed you to the door? Who held you while you did it? Damn you,
DADA did!
And in return you choked me.
and when I shat in terror,
would you give your Dad a hand,
would you help me to the door?
No, you left me there alone
to do it on the floor!

Yes, to do it on the floor!

CHORUS

YOUR ATTENTION, PLEASE!
Pheidippides
now makes his demonstration—
a proof which will,
I’m certain, thrill
the younger generation.

For this lad defeats his Dad,
there’s not an older man
or father in
this town, whose skin
is worth a Tinker’s Damn!

KORYPHAIOS

And now that Doughty Champion of Change, that Golden-Tongued
Attorney
for Tomorrow, that Harbinger of Progress

—PHEIDIPPIDES!

To Pheidippides.
Remember, Sir,
we want the truth
—or a reasonable facsimile.

PHEIDIPPIDES

Gentlemen, Eloquence
is sweet, sweeter than I ever dreamed! This utter bliss of speech!
This rapture of articulation! But oh, the sheer Attic honey
of subverting the Established Moral Order!

And yet when I look back
on those benighted days of pre-Sokratic folly, upon the boy
I used to be, whose only hobby was horses, who could not speak
three words of Greek without a blunder, why . . .
words fail me.

But now, now that Sokrates has made a fresh Pheidippides of me,
now that my daily diet is Philosophy, Profundity, Subtlety,
and Science, I propose to prove beyond the shadow of a doubt
the philosophical propriety of beating my Father.

STREPSIADES

For the love of Zeus,
go back to your damn horses! I’d rather be stuck with a stable
than be battered by a stick.

PHEIDIPPIDES

I ignore these childish interruptions
and proceed with my demonstration.

Now then, answer my question:
did you lick me when I was a little boy?
Of course I licked you.
For your own damn good. Because I loved you.

PHEIDIPPIDES

Then ipso facto,
since you yourself admit that loving and lickings are synonymous,
it's only fair that I—for your own damn good, you understand?—
whip you in return.

In any case, by what right do you whip me
but claim exemption for yourself?

What do you think I am? A slave?
Wasn't I born as free a man as you?*

Well?

PHEIDIPPIDES

But . . .

Spare the Rod and Spoil the Child?
Is that your argument?
If so,
then I can be sententious too. Old Men are Boys Writ Big,
as the saying goes.

A fortiori then, old men logically deserve
to be beaten more, since at their age they have clearly less excuse
for the mischief that they do.

PHEIDIPPIDES

But it's unnatural! It's . . . illegal!

Honor your father and mother.
That's the law.
Everywhere.

PHEIDIPPIDES

The law?

And who made the law?
An ordinary man. A man like you or me.
A man who lobbied for his bill until he persuaded the people
to make it law.

By the same token then, what prevents me now
from proposing new legislation granting sons the power to inflict
corporal punishment upon wayward fathers?

Nothing vindictive,
of course.

In fact, I would personally insist on adding a rider,
a Retroactive Amnesty for Fathers, waiving our right to compensation
for any whippings we received prior to the passage of the new law.
However, if you're still unconvinced, look to Nature for a sanction.
Observe the roosters, for instance, and what do you see?

A society
whose pecking-order envisages a permanent state of open warfare
between fathers and sons. And how do roosters differ from men,
except for the trifling fact that human society is based upon law
and rooster society isn't?

STREPSIADES

Look, if you want to imitate the roosters,
why don't you go eat shit and sleep on a perch at night?

PHEIDIPPIDES

Why? Er . . .
because the analogy doesn't hold, that's why. If you don't believe me,
then go ask Sokrates.

STREPSIADES

Well, whatever your roosters happen to do,
you'd better not lick me. It's your neck if you do.

PHEIDIPPIDES

My neck?

How so?

STREPSIADES

Because look: I lick you. All right, someday you'll have a son
and you can even the score with me by licking the hell out of him.
But if you lick me, then your son will follow your precedent
by licking you. If you have a son.

PHEIDIPPIDES

And if I don't have a son?
You've licked me, but where am I? I'm left holding the bag,
and you'll go to your grave laughing at me.

There is a long tense silence as the full force of this
crushing argument takes its effect upon Strepsiades.
STREPSIADES

What?
But how ... ?
Hmm,
by god, you're right!

To the Audience.
—Speaking for the older generation, gentlemen,
I'm compelled to admit defeat. The kids have proved their point:
naughty fathers should be flogged.

PHEIDIPPIDES

Of course, I nearly forgot.

One final matter.

STREPSIADES

The funeral?

PHEIDIPPIDES

Far from it. In fact,
it may even soothe your feelings.

STREPSIADES

Go on. I'm listening.

PHEIDIPPIDES

Well now, Misery Loves Company, they say.
So I'll give you some company:
I'll horsewhip Mother.

STREPSIADES

HORSEWHIP YOUR OWN MOTHER?

But this is worse! Ten
thousand times worse!

PHEIDIPPIDES

Is that so? And suppose I prove by Sokratic logic the utter propriety
of horsewhipping Mother?

What would you say to that?

STREPSIADES

What would I
say?

By god, if you prove that,
then for all I care, you heel,
PHEIDIPPIDES

Zeus?

You old fogey,
are you so stupid you still believe there's such a thing
as Zeus?

STREPSIADES

Of course there's a Zeus.

PHEIDIPPIDES

Not any more
there isn't. Convection-Principle's in power now.
Zeus has been deported.

STREPSIADES

That's a lie! A lot of cheap
Convection-Principle propaganda circulated by those windbags
in the Thinkery!
I was brainwashed! Why, they told me
that the whole universe was a kind of potbellied stove

Pointing to the model in front of the Thinkery.
like that model there, an enormous cosmical barbecue,
and the gods were nothing but a lot of hot air and gas
swirling around in the flue. And I swallowed it,
hook, line, and sinker!

PHEIDIPPIDES

Rave to yourself, Madman.

I'm leaving.
Exit Pheidippides.

STREPSIADES

O Horse's Ass, Blathering Imbecile,
Brainless Booby, Bonehead that I was to ditch the gods
for Sokrates!

He picks up Pheidippides' stick and savagely
smashes the potbellied model of the Universe in front
of the Thinkery. He then rushes to his own house
and falls on his knees before the statue of Hermes.

—Great Hermes, I implore you!

Be gracious,
lord! Forego your anger and give me your compassion.
Pity a poor old codger who was hypnotized with hogwash,

drunk on drivel.

O Hermes, give me your advice,
tell me what to do.
Should I sue?

He puts his ear close to the god's mouth as though
listening to whispered advice.

What?

Ummm.

Good.

Got it.

DON'T SUE...

Go on.

Yes?

BURN DOWN THE THINKERY . . . SMOKE OUT THE
CHARLATANS . . .
INCINERATE THE FAKEs!

Aye aye, Sir!

Shouting to his slave.

Quick, get me your ladder!

—Xanthias! come here!

Bring me an axe!

Xanthias runs up with a ladder and an axe.

Now
scramble up there on the Thinkery and rip up the tiles
until the roof caves in.

Shoo, boy!

Xanthias sets his ladder against the Thinkery,
ciambles up, and starts chopping at the tiles and prying
them up with his axe.

—Quick,

bring me a torch!

Another slave runs up with a blazing torch.

By god, I'll fix those fakes
for what they did to me or my name's not Strepsiades!
Let's see if they can fast-talk their way out of this.

He bounds up the ladder to the roof, furiously
firing the rafters and beams with his torch, while
Xanthias prises at the tiles with the axe. The smoke
billows up in clouds and the whole roof begins to
glare luridly, while inside the Thinkery are
heard the first signs of alarm and confusion.
FIRST STUDENT
From within.
FIRE!! FIRE!!
HELP!

STREPSIADES
Scorch 'em, Torch!
Go get 'em!
When Xanthius stops to stare at the holocaust,
Strepsiades tosses him the torch, snatches up the axe,
and starts slashing furiously at the rafters.

FIRST STUDENT
Rushing out of the Thinkery and peering up
to the roof.
—Sirrah, what dost?

STREPSIADES
Dust? That's chips,
Buster. I'm chopping logic with the rafters of your roof.

SECOND STUDENT
From within.
Who roasteth our rookery?

STREPSIADES
A man without a coat.

SECOND STUDENT
Rushing outside.
But we're burning alive!

STREPSIADES
Hell, I'm freezing to death!

FIRST STUDENT
But this is Arson! Deliberate Arson! We'll die!

STREPSIADES
Splendid. Exactly what I had in mind—
He narrowly misses his leg with the axe and
then teeters dangerously on the roof.

oops!—
so long as I don't split my shins with this axe
or break my neck in the process.
Wheezing, hacking, and gagging, Sokrates scuttles out of the Thinkery, closely followed by an incredible procession of emaciated, ghostlike Students, all gibbering with terror. Finally, at the very rear, squawking and clucking like two frightened roosters, come Philosophy and Sophistry.

SOKRATES
You there, sirrah!
What is thy purpose upon my roof?

STREPSIADES
Ah, sir,
I walk upon the air and look down upon the sun from a superior standpoint.

SOKRATES
Choking on the smoke and almost incoherent with rage.

Why, you——

agh

I'm gagging...

argh

I...
grhuahg...

CAN'T...

TALK!!

Arrrgghhh...

As Sokrates collapses into a spasm of choked coughing, Strepsiades and Xanthias come scrambling down the ladder from the roof. Then Chairephon, totally covered with soot and cinders and his cloak smouldering, streaks from the holocaust of the Thinkery.

CHAIREPHON

HALP!
It's like an oven in the Thinkery! I'm burnt to a crisp.
I'm a cinder.

STREPSIADES

Belaboring him with a stick as Xanthias lashes Sokrates.

Then why did you blaspheme the gods?
What made you spy upon the Moon in heaven?

KORYPHAIOΣ

Thrash them,
beat them, flog them for their crimes, but most of all because they dared outrage the gods of heaven!

Strepsiades and his slaves thrash Sokrates and his followers, until the whole herd of thinkers, followed by Philosophy and Sophistry, stampedes madly toward the exit. Here they meet—and flatten—Pasia and Amynias* returning to the Thinkery armed with summonses and accompanied by their witnesses. Exeunt omnes in a general rout. Behind them the Thinkery with an enormous crash collapses into blazing ruin.

CHORUS

Now ladies, let us leave and go our way.
Our dances here are done, and so's our play.

Slowly and majestically, the Chorus files out.
Notes

11. *Strepsiades*: A name derived from στρέψις (turning, twisting, wriggling). That is, Strepsiades is etymologically the Debtdodger and his name is played upon throughout the play.

11. *desert to the Spartans*: The annual invasions of Attika by the Spartans and their allies during the first few years of the Peloponnesian War meant that maltreated or discontented Athenian slaves could easily desert to the enemy, and the fear of desertion was common in Athens.

12. *ponytails*: Pheidippides wore his hair long and curling in the style affected by the younger knights.

13. *bumbailiff*: B. B. Roger's solution, perhaps too English for American ears; but the pun is almost untranslatable. The Greek word here translated as bumbailiff is δυσμπροές, inserted as a surprise in place of the expected "bedbug" or "flea."

13. *Blueblood Megakles*: Megakles was a common male name of the Alkmaionid family, one of the oldest and most aristocratic in Athens. It is largely because of the prominence of Alkmaionid names in the play that Pheidippides has frequently—and not improbably—been regarded as a caricature of Alkibiades, also an Alkmaionid and notorious for his dissolute youth.

Strepsiades' marriage to an Alkmaionid wife is, of course, a mésalliance between a prosperous farmer and a daughter of the dissolute and luxurious city nobility. Presumably, such alliances were not uncommon in the late fifth century, and Aristophanes clearly intends to show the progress of corruption in Strepsiades, ruined by his playboy son and his luxurious wife.

14. *hippos*: "Horse." A common component in aristocratic names, since in early Athens the ownership of a horse automatically meant membership in the military cavalry or the social chivalry.

15. *horse-god oaths*: As Poseidon Hippios, Poseidon was the patron god of horsemen. Cf. *Knights* 551 ff.
Cosmical Oven: The theory advanced in this passage is of uncertain provenience. In *Birds* 1001, Aristophanes attributes it to Meton, though the comedian Kratinos attributed it to Hippo in *Panoptical*, and both Herakleitos and Parmenides held that the heavens were made of Fire. Here, however, it is probably best taken as a representative—and, for Aristophanes, representatively ridiculous—example of contemporary physical theory. Some of the Sophists may have held something like it; so far as we know, Sokrates did not.

But the metaphor of the Cosmical Oven is central to the play, and for this reason Aristophanes has placed a visible model of it in front of the Thinks (cf. 11. 1473-74). Moreover, unless I am mistaken, the metaphor is a surprisingly consistent one, whose every detail and principle would have been instantly understood by an Athenian—not but an American—audience. For the principle here is that of an ordinary, humdrum, home-made charcoal-burner’s “kiln,” used incongruously as a diagram of highfalutin’ Socratic physics, and it is in the appreciation of the details that the humor of the finale lies. It is, according to Aristophanes, a kiln designed for very slow heat and very little air (i.e., a *πυρηνις*); in shape it is like an inverted bowl (i.e., a *βάτον*—cf. 1. 1473), bellied at the bottom and tapered at the top; set inside it are charcoal (i.e., *διαφάνεις*—1. 97) and above the charcoal are the swirling heated gases and flames (i.e., *ἄνθισαν διαφανεῖ*—1. 380) under whose steady heat wood becomes charcoal. Translated into the physics of the Aristocratic Sokrates, the humble charcoal-burner’s oven becomes the Universal Crucible, in which the gods are the lightning and the slow, downward-burning heat of the heavens, the forces which slowly carbonize the world and the creatures below; in which living is a form of burning and the dead are only ashes. Against this background, with only minor modifications, Sokrates’ student can demonstrate to Strepsiades the cosmical principles involved in the gnat’s buzz and Sokrates can explain the thunder as elemental farting. And it is, of course, the same metaphor which informs the finale of the play where the Thinkery itself becomes an enormous blazing kiln. Sokrates chokes on the smoke (*ἀφίλεθα*—1. 1504), Chairephon is roasted alive (*στρεφανομέθεα*—1. 1505), while Strepsiades, like a blazing god, fires the roof above them.

Such, I believe, is Aristophanes’ meaning. Because, however, charcoal kilns are unfamiliar nowadays, I have been compelled to make the Cosmical Oven an ordinary pothbellied stove and to introduce a pseudo-scientific equivalent for *Δίως*, i.e., Convection-Principle.

for a fee: The perennial gibe. The Sophists expected to be paid for the instruction they gave, an attitude which seemed mercenary to the wealthy Plato and which Platonists since have never tired of condemning. Doubtless many of the Sophists were mercenary and several were rich men, but the mere fact of accepting a salary for professional services rendered does not—except in aristocratic societies where cash payments are regarded as vulgarizing those who receive them—convict a man of intellectual dishonesty. But perhaps I am prejudiced. In any case, the sophistic movement made headway in Athens not because the Sophists were greedy mountebanks in a gullible age, but because there was a rising class with a desperate need for new skills and techniques and for this class the existing education was worse than useless. If the New Education began by being *vocational*—offering precisely those legal and verbal skills which were so urgently required for the conduct of Athenian imperialism—it ended by being genuinely *revolutionary*, that is, by systematically questioning and overturning all the established beliefs of the old order. It could never have become this, however, had not the fact of payment *freed* the Sophists from the old order as much as it *bound* them to the new. Hence the hostility and open contempt of such conservatives as Aristophanes and Plato.

Sokrates, it is true, did not accept payment, and this is Sokrates’ glory. But Sokrates’ glory is not necessarily the Sophists’ shame.

The Technique of Winning Suits: Literally, “to overcome the truth by telling lies,” i.e., the familiar accusation that the Sophists made “the worse cause appear the better.” It was precisely this charge that was brought against Sokrates by his accusers later, and Aristophanes may be responsible for the suspicion. That some Sophists professionally claimed this ability is beyond dispute. Equally, however, the sophistic attack upon traditional beliefs must have seemed both perverse and illogical to staunch conservatives. Passionately held convictions tend, i.e., to defend themselves by their look of being self-evident: those who question them are *ipse dixit* guilty of dishonesty or faulty reasoning. And this is especially true of an age when logic was in a state of comparative infancy. Plato, for instance, constantly attacks the Sophists for their devotion to specious logic (i.e., sophistry), and yet his own *Republic* contains dozens of logical fallacies and grotesque equivocations that even a schoolboy could detect. And presumably these are honest mistakes. But the Sophists normally receive no mercy.

17. two kinds of Logic: i.e., the so-called Just (or Major or Better) Logic and the Unjust (or Minor or Weaker) Logic, here rendered as Philosophy and Sophistry respectively.

The originator of the Doctrine of the Two Logics (or *Anatlogoi*) was Protagoras of Abdera. If we are right in assuming that Protagoras’ famous dictum (“Man is the measure of all things”) means that the truth is subjective, then the same statement also implies that a proposition can be simultaneously both true and false. And it is a fact that Protagoras taught his students to argue both sides of a given statement with equal plausibility—presumably as an exercise in forensic virtuosity. The very willingness of Athenian courts to consider matter that would now be regarded as in-
admissible supports the view that these exercises were practical in scope and not deliberate attempts to subvert justice. But for Aristophanes the Antilogoi are transparent sophistry, humbug on a huge scale, and he accordingly makes the debate between the two Logoi the climax of the comedy.

It is customary, of course, to translate Δήγος as “Logic” or “Argument,” and this is the literal meaning of the word. But the issue here is larger, and to translate this way tends to obscure the fact that Aristophanes is talking, not about systems of formal logic, but about a whole system of Reason, discursive and nondiscursive alike. Δήγος also means Reason; but Reason includes several modes of discourse ranging from the work of the imagination to moral reason and strictly logical reason in the narrow sense. The so-called Just Argument, for instance, is not really an argument or a logical system at all; it is a personification of the kind of Reason spoken by a certain kind of society before logic, strict logic, existed: a Reason which expressed itself in education, in morals, in imagination, in the criteria of values and the justifications offered for those values. As opposed to the Unjust Argument, it represents the rational power of poetry—and the peculiar logic of poetic imagination—against the rational power of prose and formal logic (and for this very reason Aristophanes lets the Just Argument speak in splendid anapests while the Unjust Argument uses prosy iambics). In ethics, it represents the power of rational syllogism—by means of models and parallels drawn from the great body of lyric and epic poetry—in contrast to a system of ethics, just as rational but rational in a different way, sanctioned by inferences drawn from Nature and animal existence (cf. Pheidippides’ inferences from the life of the rooster, 11. 1427-29). In culture, it is the rational guidance of Custom (not Blind Custom), the corrective rightness of traditional experience as against the restless innovations and risky isolation from experience and history of the pure intellect. It is not what the modern world normally means by Reason, and certainly not what Protagoras meant, but it is, I think, what Aristophanes meant and what most Greeks would have understood him to mean. But for this very reason, because his Logos is not a logic but a prelogical discourse of the whole human reason, the Just Argument is helpless against his opponent. His case cannot be expressed logically, and yet it remains rational.

All this may seem like compounding old humbug with new, but it is the justification I make for translating Δίκαιος Δήγος as Philosophy and “Δήγος Αδήγος as Sophistry. Sophistry, of course, should be taken in the strict sense of the word, Philosophy in the loose and unprofessional sense (as in the catchphrase, “a philosophy of life”).

miscarriage: Probably a conscious echo of Sokrates’ claim to be a midwife of ideas.

page 18. miscarriage: Probably a conscious echo of Sokrates’ claim to be a midwife of ideas.

page 21. Spartan prisoners from Pylos: Cf. Glossary, under Pylos. After their imprisonment, the Spartans must have been considerably emaciated.

21. geological research: Literally, “they are exploring the things under the earth.” This was, in fact, one of the accusations brought against Sokrates by his accusers in 399 B.C. In substance the charge implies that scientific research is blasphemous, insofar as the very act of investigating Nature suggests that the inquirer has doubts about the received cosmology. In the Apology, Sokrates admits to having dabbled in scientific research in his earlier days; the later Sokrates, Plato implies, had quite outgrown such nonsense.

23. And as patriotic as it is useful: During the years preceding the Peloponnesian War, Athens sometimes confiscated the territory of rebellious subject cities. The land so confiscated was then divided by lot and portioned out among the poorer citizens of Athens. Such allotments, needless to say, were enormously popular—at least in Athens.

24. a single lawcourt in session: The Athenian love of litigation was notorious, and Aristophanes never misses a chance of hitting it. Cf. Wasps.

26. Bars of iron, like the Byzantines?: Sokrates’ statement that the gods are an expression coined by vulgar superstition causes Strepsiades to think of a less vulgar sort of coinage. And so he comes up with the Byzantines who, alone in the Greek world, used coins made of iron.

27. the mystical couch: Probably a very battered settee. The reader should perhaps be aware that the whole scene of Strepsiades’ admission to the Thinkery and introduction to the Clouds is an elaborate “philosophical” initiation rite, probably paralleling initiation into one of the many Greek mysteries. Thus Sokrates’ researches are mysteries; Sokrates powders Strepsiades as a purification; Strepsiades wears a chaplet and is forced to strip naked (like a candidate at the Eleusinian Mysteries) before entering the cave at the rear of the Thinkery (which reminds him of the cave of the oracular Trophonios, a Theban seer). After his entrance he must undergo an ordeal (whippings, bedbugs, etc.) before being vouchsafed rebirth as a new man.

27. poor Athamas: Cf. Glossary: Athamas. Athamas attempted to kill his son Phrixos; when sentenced to be sacrificed for the attempt, he was saved by Herakles. The point here is that Strepsiades’ mythology is inaccurate and his literary education has been neglected. But since no conceivable modern audience can be expected to know—or even to care—whether Athamas was killed or saved, I have deliberately intruded the two succeeding lines in the hope of making them seem Aristophanic and the situation a little clearer.

31. That’s why they write: Presumably all the effusions which follow this are genuine examples of what happened when the Murky Muse inspired a dithyrambic soul.
But I'm not a burglar: According to the Scholiast, this line is explained by the customary Athenian procedure for searching a house in which stolen goods might have been hidden. The searcher was required to strip so that he could not, under pretense of carrying out his search, convey into the house of the accused the goods presumed to have been stolen. Sokrates' reply in the following line is an intruded gloss of my own manufacture, designed to give the situation a possible point for a contemporary audience.

ARISTOPHANES: In the Greek text the speech which I have here assigned to Aristophanes is given to the Chorus in accordance with the normal convention of the parabasis. But if the Chorus in a normal parabasis speaks on behalf of the poet, the parabasis of Clouds is unique in having the Chorus speak, in the first person, as the poet himself. Doubtless in the original version of this play, the parabasis was spoken by the Chorus on the poet's behalf; but in the revision Aristophanes himself has laid aside the mask and speaks directly for himself. In the circumstances it seemed unnatural to give the Chorus the poet's lines, and I have therefore brought Aristophanes on stage to speak for himself in person.

A stranger / rescued the foundling: Aristophanes had produced his comedy The Banqueters under the name of Kallistratos. His reason for so doing, he claims, was natural modesty and observation of Athens' neglect and mistreatment of her comic poets (cf. Knights 514-45); more likely, he was too young to enter the contest under his own name.

Elektra in the play: Cf. Glossary: ELEKTRA.

dangling thong of leather: The comic phallus. Despite the almost unanimous consensus of scholars that Aristophanic characters did not wear the phallus, and Aristophanes' explicit denial here, I am nonetheless convinced they did. My only argument is the text and the near impossibility of explaining the dramatic action of numerous scenes in the absence of the phallus. In Clouds, Strepsiades' little play on "finger-rhythm" (652 ff.) literally requires the phallus, as does his parting threat to Amyndias (1299-1302). The masturbation-jingle in Knights (24 ff.) is unaccountable without it; the Wasps are stingless, etc., etc. Nor am I in the least deterred by Aristophanes' denial—the prize evidence of those who deny the phallus in Aristophanes—simply because it would be the height of ingenuousness, I think, to take Aristophanes' word for it, especially here. The Clouds may very well be a daintier, wittier play than the comedies of Aristophanes' rivals, but the disclaimers here are slyly contradicted by the play: several scenes are pure slapstick, Strepsiades beats his opponents with a stick, etc.

a dirty dance: That is, the kordax. Cf. Glossary: KORDAX.

Paphlagon: Cf. Glossary: PAPHLAGON.

hard on the heels of the Levin rattled the steeds of Thunder: A quotation from Sophokles' (lost) Teukros.

How the moon, in dudgeon, smudged her flame amongst the rack, and the sun in sulkeness withdrew: An eclipse of the moon took place in October 425, and a solar eclipse in March 424, just before the election of Kleon as general.

your mouth is a consequent chaos: An allusion to the confusion created in the Hellenic calendar by the Athenian astronomer Meton. Instituted in 432 B.C. and then gradually adopted throughout Greece, the Metonic calendar changes made for initial difficulties. Because the reform was not uniformly adopted throughout Greece, the same festivals in different places would fall on different dates, etc.

stripped Hyperbolos of his seat: Hyperbolos (cf. Glossary) had been appointed Athenian delegate to the Amphictyonic Council of Delphi in 424 B.C. The Council was a religious and juridical federation of Greek city-states whose primary concerns at this time would have been the war and infractions of such "international law" as existed at the time. Presumably, this Council would have been responsible for smoothing the way to general Greek adoption of the Metonic calendar. Exactly what happened to Hyperbolos is not known; the Chorus says that it "stripped him of his crown"—which may mean, as Rogers suggests, that the wind blew off the sacred chaplet which he wore in his official capacity. From the anomy of the Clouds, it can be reasonably assumed that Hyperbolos had supported the Metonic reform.

vulgarly called finger-rhythm: ῥυθμῶς in Greek means both "finger" and "dactylic meter."

Raising his phallus to the ready: Cf. note on p. 120: dangling thong of leather.

the female's a duchess: An anachronistic pun of my own invention; the Greeks had ducks but no dukes. Literally, the Greek says "the male is a rooster (ἁλκέιτος), the female a roostertette (ἁλκέτταρτετα)
"

You've made basket masculine, when it's feminine: "Basket" is my own contribution. In the Greek, the word is κάρδον, "a kneading-trough," whose nominative termination is normally the sign of the masculine gender, though κάρδα is in fact feminine. This pun, of course, leads directly to discussion of Kleonymos, another instance of a masculine ending for an actual feminine.

Why, Amyndias: In the original, this whole passage is based upon a play on the Greek vocative (whereby the nominative Amyndias becomes Amyndia—which has the -a termination of the feminine nominative). Because English has no vocative, I have recast the play here as a confusion between singular and plural. For Amyndias, cf. Glossary: AMYNDIAS.

witchwomen from Thessaly: Throughout antiquity, Thessaly was famous
for its red-headed witches. Cf. Apuleius *Metamorphoses* 1; Plato *Gorgias* 513 a.

page 60. scorch out every word of the charges: The charges would have been written down on a wax tablet.

65. Expended as required. / No comment: When asked to account for the expenditure of several talents (actually used to purchase the withdrawal of the Spartans), Perikles answered only: "I spent them as required."

66. Even Hyperbolos: Hyperbolos had evidently studied under the sophists for a fee of one talent—a large sum.

67. from the/neck up they are fighting-cocks: According to a Scholast, the Logics were garbed as fighting cocks and brought out in cages. This statement has rarely won the approval of scholars, who are quick to point out that it is contradicted by the references throughout the debate to hands, clothing, and other parts of the human anatomy. If I am right, the Logics wore rooster masks and a few feathers with perhaps a great vivid bustle of tail feathers; but from the neck down they were visibly human. After their adoption by the Birds, Aischylos and Euripides appear garbed in this very way (cf. *Birds*). Such a solution allows Aristophanes to present the Logics as fighting cocks or as wrestlers as his dramatic needs required, and the text seems to me to support this.

69. how Zeus escaped punishment after he imprisoned/his father: Zeus de-throned his father Kronos and bound him in chains. The same argument is used by Euthyphro (cf. Plato *Euthyphro*) to justify his prosecution of his own father. But the argument here is interesting because it shows clearly the mythological rationale of the Old Education and the way in which the New Education refuted it. For the Old Education, mythology was a rational corpus of heroic behavior and morality was taught in mythological terms, quite despite the fact that the morality of mythology was incompatible in many instances with the operative moral values of the fifth century. The greatest artists of the older generation—Aischylos and Pindar—had in fact attempted to reconcile myth and moral behavior by rewriting the offensive myths and expelling their crudities or giving them new—and moral—interpretations. The exponents of the New Education quite naturally turned their characteristic invention—formal logic—against the Old Education by pointing out the inconsistencies of its morality and mythology. The same purpose informs many of Euripides' tragedies, and for this reason he incurred the suspicion and contempt of Athenian conservatives—quite despite the fact that his own artistic intentions were really very much like those of Aischylos, an attempt to harmonize mythology and morality. But because the morality was relatively new—or looked that way—and was supported by a logic which was destructive of the old morality, he was not understood by conservatives. Few artistic feuds seem, in fact, more futile than Aristophanes' with Euripides, since—apart from dramatic differences—the two men basically believed the same things.

page 71. Telephos: Cf. Glossary: TELEPHOS.

71. Pandaletos' loaf: Cf. Glossary: PANDALETOS.

73. the Old Education: Readers interested in knowing more about the conflict between different views of education in fifth-century Athens and the rationale of the Old Education should consult the relevant chapters of Werner Jaeger's *Pai'deia*. Suffice it to say here that it was basically a curriculum comprising two major fields called respectively Music and Gymnastic. By Music was meant the education of the inward man; the school not merely of the mind, but of the emotions, the "soul," the feelings and the thoughts in their rational ensemble. The basic instrument of this inward education was poetry joined to music, a blend in which poetry taught by means of example and emulation and was sustained by music which was believed to inculcate the moral virtues. Gymnastic was, of course, vigorous and disciplined athletics. The intended product of this theory of education was a disciplined reason in a disciplined body, an outward grace which expressed the grace and harmony within, the whole person embodying the classical virtues: self-control, decorum, respect for others, piety toward the gods, moderation in all things, dignity and courage. It was, in short, far more what we would call moral education, education in "character," than intellectual training. It was also, for obvious reasons, the education of a restricted and exclusive class. It taught no skills, prepared for no career, and was obviously impractical for Athenian society of the late fifth century. For these reasons, it has always appealed to the exponents of "education of character," British public schools and their American imitators. Aristophanes put his whole heart into its exposition here, and I have done my best to overcome my own repugnance, though probably unsuccessfully.

It would, of course, have been a pleasure to modernize the debate and present it in topical terms as a struggle between the views of education represented—less than ideally, of course—by American universities and that preposterous pretence of education perpetrated by the professional "educationists" in the secondary schools of America; but this is a suggestion which might be adopted by a producer in search of a topical Aristophanes; for a translation, it is out of the question.

73. A Voice from Afar or Hail, O Pallas, Destroyer!: According to the Scholast, the second of these hymns is ascribed to Lamprokles of Athens; the first to Kydeides of Hermione.

73. their conduct was manly: The point is precisely the manliness. The fashionable homosexuality of the Athenian upper classes was essentially borrowed from Sparta, where homosexuality was not only tolerated but even encouraged as a military virtue (because "lovers" would fight well for each other). Hence the contempt with which Philosophy regards the
effeminate homosexuals of the Athenian New Education. Only among the Athenian lower classes was homosexuality viewed with contempt. The modern image of an Athens populated exclusively by happy philosophical pederasts is largely due to the fact that the surviving literature is a leisure-class production; poor men were very rarely Platonists.

**page 77.** *Baths of Herakles:* Greeks normally named hot baths everywhere the Baths of Herakles. Another example of specious logic against which Philosophy is helpless.

**77.** *Old Homer:* This argument must have hurt. Of all the poets, Homer was regarded as the Old Education as the greatest, the Bible of true belief. And now, like the devil, Sophistry quotes scripture.

**78.** *Peleus:* Cf. Glossary: PELEUS.

**78.** *Hyperbolos and swords just don't mix:* Because Hyperbolos presumably attempted to avoid military service.

**79.** *reamed/ up the rectum with a radish:* The poetic punishment meted out to adulterers in Athens.

**82.** *Due date for debts:* Strepsiades does not actually say this. What he says is that the day he fears is “the-Old-and-The-New.” By this he means the effective last day of the lunar month, the day on which both the last of the waning Old Moon and the first of the waxing New Moon could be seen. The-Old-and-The-New, in short, was the normal name given to the last day of the month, the day on which debts were payable. And this nomenclature continued to be used even when the calendar was no longer lunar. The term is, to modern ears, grotesquely unfamiliar, but it is also crucial to an understanding of the action, and for this reason I have had considerable misgivings about altering it. But upon reflection it seemed to me that “Due date” might just possibly do, and I have so rendered it. But see the note on this page: Today's Tuesday.

**82.** *Call it an honorarium:* Aristophanes, that is, hints that Sokrates was not above receiving “tokens of esteem” from his disciples. This may be pure satirical malice, but then again it may not be. Sokrates' students were mostly rich aristocrats; he himself was poor. And in the circles which Plato frequented, a distinction was probably drawn between a payment and a “gratuity”—the common sophistry of “good society.” But this is guesswork.

**83.** *with gladsome paens plangent:* An echo, according to the Scholiast, from the Satyr of Phrynichus—or Euripides' *Peleus.* Probably the latter.

**83.** *deboch from mine abode:* A very slight modification of Euripides’ *Hekabe* 173ff.

**84.** *Today's Tuesday:* Cf. note above: *Due date for debts.* For a more literal rendering of Pheidippides' sophistic analysis of the-Old-New-Day in the following lines, readers should consult any prose translation of the play. I have preferred to use the “Tuesday—two day” pun because it made the equivocation instantly visible as glib hocus pocus, though it also meant a necessary change—a slight one—in the interpretation of Solon's legislation which Pheidippides offers. But I suppose most readers of the *Clouds* to be more interested in a comedy than in the details of Athenian debt legislation.

**page 84.** *to post their bond:* Before commencing a legal action against a defaulting debtor, a creditor had to post with the prytanies, as caution money to defray court expenses, the sum of 10 per cent of the amount of the debt.

**85.** *Precisely because they are magistrates:* A deliberate distortion of the literal meaning of the Greek. The text actually says: “They act like Foretasters; in order to devour the meal as quickly as possible, they have the deposits paid a day in advance.” The Foretasters seem to have been officials responsible for sampling the dishes to be served at a public feast the following day.

**87.** *the National Honor:* The National Honor (and, one might add, the public interest) of Athens required that every citizen be as litigious as possible.

**91.** *tragedy / by Karkinos:* Karkinos was a frigid, fourth-rate tragedian with an apparent penchant for introducing querulous beggar-gods in his plays. Most of the fustian which follows is presumably the work of Karkinos or his son Xenokles. Talent did not run in the family.

**100.** *a custom a custom:* The festive custom of paroimia, according to Rogers, an old convivial tradition of singing at table.

**100.** *Shearin' o' the Ram:* Krios (which also means "Ram") was a wrestler, probably the victim of an overwhelming defeat in a wrestling match, and hence the "Shorn Ram." Simonides' poetry was very highly regarded by the older generation.

**101.** *bomastic bore / in poetic history:* The charge was common in antiquity. In an age of discursive prose and colloquial poetry, the gorgeousness of Aischylos and his extravagant metaphorical bravura made him look like a drunken lord of language. For Aristophanes, of course, Aischylos is the Model Poet who "makes men better citizens" as opposed to the Arch-Corrupter, Euripides. Cf. *Frogs.*

**101.** *One of those slimy tragedies:* A reference to Euripides' (lost) *Aietos.*

**104.** *Wasn't I born as a free man as you?:* A parody of Euripides' *Alkestis* 691.

**107.** *the insubstantial Clouds men build their hopes upon:* This line and most of the two which follow it are Arrowsmith, not Aristophanes. I have intruded them in order to give just a little more resonance to the meaning of the Clouds. For although English has idioms in plenty which more or less parallel the Greek—to "have one's head in the Clouds," "to build on the clouds," "castles in the clouds," etc.—a little further rounding out seemed necessary. The Clouds are the patrons of visionaries and wool-gatherers the world over; here they are cloudy deceivers, the shining hopes that deceive Strepsiades.
Page 113. *Pastias and Amyntias*: The Greek plays, of course, have come down to us without footnotes or stage directions other than what the Scholiasts tell us. And I admit that there is no textual justification for bringing back Pastias and Amyntias here, nor is it suggested by any Scholiast. They are here because Pastias threatened to pay his bond and return with a summons, and because I think Aristophanes would have liked them to be foiled again, even at Strepsiades' moment of truth.

**Glossary**

*Aischylos, Aeschylus*: The great Athenian tragedian (525-456 B.C.).

*Akademē, Academy*: Originally a precinct sacred to the hero Akademos and afterward used as a gymnasium and recreation area. The general Kimon planted it with groves of olives and plane trees. Only in the fourth century, after becoming the haunt of the philosopher Plato and his followers, did the once athletic Akademy become academic in the modern sense of the word.

*Akropolis, Acropolis*: The citadel of Athens.

*Achibides*: An Athenian politician (ca. 450-404) of great ability and brilliance. Of aristocratic Alkmaionid descent, he was related to Perikles and was, for some time, a devoted disciple of Sokratos. Distinguished by wealth, birth, and spectacular personal beauty, he spent his youth in lavish display and debauchery (Phidippides in *The Clouds* has been thought to be a caricature of Achibides). After the death of Kleon in 422, Achibides became chief of the belligerent anti-Spartan party in Athens in opposition to the more conservative Nikias and was one of the primary advocates of the disastrous Sicilian expedition.

*Amyntias*: Son of Pronapes and one of Strepsiades' creditors in *The Clouds*. He was not, however, a professional moneylender but a notorious effeminate and wastrel, probably addicted to gambling.

*Antimachos*: A homosexual on a prodigious scale.

*Apollo*: God of prophecy, music, healing, and light; his two chief shrines were at Delphi (q.v.) and the island of Delos (q.v.).

*Atheides*: Goddess of the hunt and the moon, sister of Apollo (q.v.).

*Athenas*: King of Orchomenos and the legendary subject of a (lost) play by Sophokles. Having attempted to murder his son Phrixos (q.v.),
Athamas was sentenced to be sacrificed. He was crowned with a sacrificial wreath and dragged before the altar, but just before being dispatched, was saved by the sudden intervention of Herakles.

**Athena, Athene:** Goddess of wisdom and war and patroness of Athens.

On her breast she wore the segis, a goatskin plated with scales and a Gorgon's head in the center.

**Bacchus:** See Dionysos.

**Byzantium:** A city on the Bosporus and a subject-city of the Athenian Empire. Its siege by the Athenians under Kimon in 469 was celebrated.

**Cairophone:** A pupil and disciple of Sokrates; his scrappiness and emaciated pallor are constantly ridiculed by Aristophanes.

**Delos:** Small Aegean island sacred to Apollo.

**Delphi:** A town in Phokis, celebrated for its great temple and oracle of Apollo.

**Demeter:** The Earth-Mother; goddess of grain, agriculture, and the harvest, worshipped in her shrine at Eleusis in Attika.

**Dionysos:** God of vineyards, wine, and dramatic poetry; also called Bacchus, Evios, Bromios, etc.

**Elektra:** Daughter of Agamemnon and Clytemnestra; with her brother Orestes she murdered her mother for having killed her father. In the *parabasis* of The Clouds, Aristophanes alludes to the famous scene in Aischylos' *Choephoroe*, when Elektra recognized that her brother Orestes had returned to Argos from the lock of hair left on Agamemnon's tomb.

**Ephesus:** A city in Asia Minor (Ionia), site of a famous temple of Artemis.

**Euobea:** A large and fertile island northeast of Attica. In 457 Perikles planted an Athenian colony on the island and otherwise exploited it. As a result the island revolted in 445 and had to be resubjugated. This time, however, Perikles' treatment of the island was so severe that it was commonly said (at least by his enemies) that he had "stretched Euobea on the rack of torture."

**Eupolis:** An Athenian poet of the Old Comedy and a rival of Aristophanes. Eupolis claimed that Aristophanes had imitated him in *The Knights*, and Aristophanes countered by charging that Eupolis' *Marikas* was a plagiarism of his own *The Knights*.

**Euripides:** Athenian tragedian (480-406 B.C.) whose character and plays were constantly ridiculed by Aristophanes. Euripides' mother may have been (though this is uncertain) a marketwoman who sold chervil, and Aristophanes never tires of twitting the tragedian about his mother's vegetables.

**Herakles:** Hero and demigod, son of Zeus and Alkmene; renowned for his great labors, his prodigious strength, and his gluttonous appetite.

**Hermes:** God of messengers and thieves; in Athens in every doorway stood a statue of Hermes (i.e., a herm, usually a pillar surmounted by a bust of the god), protector of the door and guardian against thieves—presumably because it takes a thief to keep another thief away.

**Hieron:** A dithyrambic poet and tragedian, notorious for his extraordinary shagginess, bestial appearance, and pederasty.

**Herodes:** Athenian general and nephew of Perikles; his three sons, it seems, were all distinguished for their stupidity and were popularly nicknamed "The Pigs."

**Hyperbolos:** An Athenian demagogue, successor to Kleon on the latter's death in 422. Of servile origin, he seems to have been a peddler of lamps and then to have studied with the Sophists in order to advance himself politically. (At least these are the charges made against him by Aristophanes.) He was later ostracized and finally murdered by the oligarchical leaders in Samos.

**Karkinot:** An Athenian tragic poet whose poetry and three sons are all ridiculed by Aristophanes. Karkinot's name means "Crab."

**Kekrops, Cekrops:** Legendary first king of Attika and reputed founder of Athens. Hence "country of Kekrops" is equivalent to "Athens," and "son of Kekrops" to "Athenian." He is usually represented as twi-form, i.e., with the head and upper trunk of a man, but serpent-shaped below (symbolizing his earthborn origin).

**Kikyia:** An Athenian deme of the tribe of Akamantis.

**Kleon:** Son of Kleainetos; the most notorious and powerful of all Athenian demagogues. After the death of Perikles in 429 B.C., Kleon became, until his own death in 422, the leader of the radical democracy and the anti-Spartan extremists in Athens. An impression speaker and a thoroughly unscrupulous and venal politician, he was bitterly loathed and attacked by Aristophanes. In 424 B.C., thanks to his coup in capturing the Spartan hoplites at Spaktereia, he reached the height of his power; so unchallengeable was his position that he was able to persuade the Athenians not to accept the handsomely offered treaty of Sparta in an attempt to recover her imprisoned hoplites. Filled with confidence in his military ability and tempted by the hope of victory, Kleon took command of an Athenian army in Thrace, where, in 422, he was defeated and killed by the Spartan forces under Brasidas.

In Aristophanes' *The Knights*, Kleon is only slightly masked under the name of Paphlagon (q.v.).

**Kleonymos:** A corpulent gluton and part-time informer; Aristophanes' commonest butt for cowardice (i.e., throwing one's shield away).

**Kordax:** A salacious dance commonly used in Athenian Old Comedy.
KRONOS: Father of Zeus, Hera, and Poseidon. Deprived of his rule by Zeus. Synonymous with "old fogy."

KYNTHOS: A mountain on the island of Delos, sacred to Apollo.

LEGGORAS: A wealthy Athenian gourmet, addicted to horse raising (or possibly to pheasant-breeding). Father of the orator Andokides.

LYDIA: A district of Asia Minor; under its greatest king, Kroisos (Croesus), it included almost all of Asia Minor from the river Halys to the Ionian coast. Its wealth and effeminacy were proverbial among Greeks.

MAENADS: The frenzied female worshippers (Bacchantes) of Dionysos (q.v.).

MAJORIS: An inland sea (the modern Sea of Azov), northern arm of the Black Sea.

MARATHON: The famous battle (490 B.C.) in which the Athenian forces under Miltiades crushingly defeated the first Persian invasion of Hellas.

MEGAKLES: A name belonging to the Alkmaionid family, one of the proudest and most distinguished aristocratic families of Athens.

MEMNON: Famous hero, son of Thetis and Eos (Dawn); killed in the Trojan War at the hands of Achilles.

MIMAS: A mountain on the coast of Ionia.

NEMEON: King of Pylos and a hero of the Trojan War, famous for his wisdom and eloquence.

OLYMPUS: Mountain (app. 9700 feet, alt.) in Thessaly, covered at the summit with perpetual snow and reputed by the Greeks to be the abode of the gods.

PALLAS: The goddess Athena (Pallas Athene).

PANTHEIA: The great Athenian festival in honor of Athena.

PANDALEOS: A professional informer.

PAPHLAGON: Aristophanes' (and presumably Athens') nickname for the demagogue Kleon (q.v.). The name is intended to suggest: (1) that Kleon came of slave and foreign stock—i.e., was not an Athenian but a Paphlagonian—and (2) the sheer volume and violence of Kleon's rhetorical assaults (from Greek paphlazein, to froth, bluster, storm).

PARNASSOS: A high mountain to the north of Delphi (q.v.); one of the chief haunts of Apollo and the Muses, but frequented also by Dionysos.

PARNES: A mountain in the northeast of Attika, forming part of the boundary between Attika and Boiotia. Near its foot was situated the deme of Acharnai.

PASIA: One of Strepsiades' creditors; evidently a grotesquely fat man and probably a drunkard to boot.

PELEUS: Hero of mythology, husband of Thetis and father of Achilles. According to legend, Astydama, wife of Akastos, fell in love with Peleus but was rejected by him. Angered, she denounced him to her husband for having attempted to seduce her. Akastos thereupon invited Peleus to a hunting expedition on Mt. Pelion, stripped him of his weapons, and left him to be torn to pieces by the wild animals. When Peleus was almost on the point of death, however, the god Hermes brought him a sword.

PERICLES: Greatest of Athenian statesmen of the fifth century, and from 461 B.C. until his death in 429, the almost unchallenged leader of the radical Athenian democracy. Of one of Athens' most aristocratic families (the Alkmaionids), he was nonetheless the politician most responsible for the creation of the extreme democracy of the late fifth century. To Aristophanes' critical and conservative eyes, it was Pericles who was responsible for the corruption of Athens, and Aristophanes never tires of contrasting the Athens of the Persian War period with the Athens of Pericles—corrupt, effete, cruelly imperialistic, avaricious, at the mercy of Sophists, clever orators, and impostors, cursed with a system (e.g., the law courts) which practically guaranteed further excesses and injustices. Worst of all in Aristophanes' eyes was Pericles' belligerent war policies (e.g., the famous Megarian Decree of 432) and the fact that, after 429, Athens was left to the mercies of men like Kleon and Hyperbolos who lacked Pericles' restraint and political genius. Like almost all the comic dramatists, Aristophanes was a conservative (not an oligarch), and although he distinguishes clearly between Pericles and his corrupt successors, he nonetheless holds Pericles responsible for creating the political system in which men like Kleon could thrive.

PHOIBOS: Apollo (q.v.).

PHYLLEX: Son of Athamas (q.v.); on the point of being sacrificed to Zeus, he was rescued by his mother Nephele.

PHYRONICHES: The famous early Athenian tragedian.

PHYRUS: Of Mytilene, a famous citharist and musician of the fifth century; his innovations shocked and angered contemporary conservatives.

POSEIDON: Brother of Zeus and god of the sea. As god of the sea, he girdles the earth and has it in his power, as Poseidon the Earthshaker, to cause earthquakes. In still another manifestation, he is Poseidon Hippocales, patron god of horses and horsemen.

PRODIES: Of Keos, the famous sophist and friend of Sokrates.

PYLOS: Town of the southwestern coast of Messina whose siege and capture, along with the neighboring island of Sphakteria in 425-24, became a cause célèbre of the Peloponnesian War and the major source of Kleon's prestige and power in Athens. As a result of their defeat at Pylos and the capture of their hoplites, the Spartans were forced to sue for peace; every overture, however, was met by the determined refusal of Kleon, eager for the war to continue.
SARPEDON: Legendary hero, son of Zeus and Europa; killed by Patroklos during the Trojan War.

SIMON: A swindler, the details of whose peculations are unknown.

SIMONIDES: Of Keos, the great sixth-century lyric poet.

SOKRATES: (Ca. 469-399 B.C.) The great Athenian philosopher and teacher of Plato. In appearance he was almost grotesquely ugly; with his bulging eyes, fat lips, and a round paunch, he looked like nothing so much as a Satyr or Silenos. This, combined with his practice of strolling about the marketplace and accosting citizens with questions about truth, justice, beauty, etc., made him an apt target for ridicule, all the more since it is doubtful whether the majority of Athenians could, in fact, distinguish between Sokrates and the average Sophist. That this is the case can be inferred from The Clouds and Aristophanes’ extremely sophistic presentation of Sokrates.

SOLON: Famous Athenian legislator (ca. 638-588 B.C.), whose achievement it was to have ended debt-slavery in Athens.

SOPHOKLES: The Athenian tragedian (495-404 B.C.).

TELEPHOS: Legendary king of Mysia and the subject of tragedies by Aischylos, Sophokles, and Euripides. Wounded by Achilles while defending his country, Telephos was informed by an oracle that only the weapons which had given him his wound could cure him. Thereupon, disguised as a beggar, he made his way to Argos where, with the connivance of Klytiamnesta, he covertly took the young Orestes hostage. When the gathered Greeks were condemning Telephos for his hostility to their cause, the disguised hero made a speech in his own defense, but with such warmth and eloquence that the Greeks recognized him. When Achilles demanded his death, Telephos threatened to kill the infant Orestes. Finally, Achilles relented and agreed to give Telephos the weapon which had wounded him and which would cure him.

THALES: Of Miletos (ca. 636-546 B.C.), one of the Seven Sages of antiquity; renowned for his scientific genius and for having predicted an eclipse of the sun.

THEOROS: Flatterer, perjured, sycophant of Kleon.

THESSALY: A large district in northern Greece, renowned throughout antiquity for its abundant supply of witches.

THETIS: The sea nymph, mother of Achilles by Peleus (q.v.). Courted against her wishes by Peleus, she changed herself successively into a bird, a tree, and a tigress. But Peleus, acting on the instructions of the centaur Cheiron, countered by holding her fast until she assumed human form and consented to marry him.

TELEPOLEMOS: Hero and son of Herakles, the subject of a tragedy by the dramatist Xenokles, one of the sons of Karkinos (q.v.). In the play
